## **Duty Drawback 200203 As Amended Up To 161:**

**Duty Drawbacks, Competitiveness, and Growth** Elena Ianchovichina, 2005 Many countries use duty drawbacks on exports yet they have been given little attention in the literature and there is no consensus whether countries should embrace or abandon them Ianchovichina asserts that the answer depends on a country's development priorities and economic conditions An increase in the drawback has a positive impact on export competitiveness and employment but could lead to exports with low domestic value added The welfare effects of duty drawback reform are ambiguous An increase in the drawback is more likely to be welfare improving if the economy is small with high input tariffs low initial drawback low administrative costs and leakages in the tariff collection system In China duty drawback removal after meeting WTO commitments will deepen domestic supply chains and improve welfare but will hurt China's economic efficiency export competitiveness and real factor incomes Further liberalization could mitigate these negative effects This paper a product of the Economic Policy Division Poverty Reduction and Economic Management Network is part of a larger effort in the network to study growth and competitiveness World Bank web site [Global Economic Prospects 2004](#) World Bank, 2003 This is the 14th edition of this annual publication which analyses the global and national dimensions of the investment climate for developing countries in terms of the policy and institutional environment It considers the key multilateral trade issues and suggests policy options to help raise living standards in developing countries and reduce global poverty Topics discussed include the short medium and long term global economic outlook including driving forces commodity prices and capital flows exports from developing countries trade barriers and policies to reduce inequities in the world trading system trade in agriculture including possible changes in subsidies and the potential for liberalisation measures the temporary movement of labour within the General Agreement on Trade in Services GATS trade facilitation in the light of post September 11 security concerns the role of trade preferences exemptions from WTO rules and technical assistance to implement WTO trade regulations *Trade Policy Analysis in the Presence of Duty Drawbacks* Elena Ianchovichina, 2004 Duty drawback schemes which typically involve a combination of duty rebates and exemptions are a feature of many countries trade regimes They are used in highly protected developing economies as a means of providing exporters with imported inputs at world prices thus increasing their competitiveness while maintaining the protection on the rest of the economy In China duty exemptions have been central to the process of trade reform and have led to a tremendous increase in processed exports using imported materials Despite the widespread use and importance of duty drawbacks these new trade liberalization instruments have been given relatively little attention in empirical multilateral trade liberalization studies Ianchovichina presents an empirical multi region general equilibrium model in which the effects of policy reform are differentiated based on the trade orientation of the firms The model is useful for analyzing trade liberalization in the presence of duty drawbacks assessing whether countries should introduce or abolish these types of arrangements and evaluating the impact of improved duty drawback

system administration The author's analysis shows that failure to account for duty exemptions in the case of China's recent WTO accession will overstate the increase in China's trade flows by 40 percent welfare by 15 percent and exports of selected sectors by as much as 90 percent The magnitude of the bias depends on the level of pre intervention tariffs and the size of tariff cuts the larger the initial distortions and tariff reductions the larger the bias when duty drawbacks are ignored The bias in the estimates of China's real GDP trade flows and welfare changes due to WTO accession increases more than three times when China's pre intervention tariffs are raised from their 1997 levels to the much higher 1995 levels These results suggest that trade liberalization studies focusing on economies in which protection is high import concessions play an important role and planned tariff cuts are deep must treat duty drawbacks explicitly to avoid serious errors in their estimates of sectoral output trade flows and welfare changes This paper a product of the Economic Policy Division Poverty Reduction and Economic Management Network is part of a larger effort in the network to study tax policy competitiveness and growth

WTO rules and technical assistance to implement WTO trade regulations      **Managing Openness** Mona Haddad, Ben Shepherd, 2011 The global financial crisis triggered a broad reassessment of economic integration policies in developed and developing countries worldwide The crisis induced collapse in trade was the sharpest ever since World War II affecting all countries and all product categories A huge shock to the trading system combined with severe macroeconomic instability makes it natural for policymakers to call into question the basic underlying assumptions of trade liberalization and openness In particular outward oriented or export led growth strategies are being reassessed as openness is increasingly associated with greater volatility However it is crucial not to lose sight of the dynamic benefits that openness can offer Examples include technology transfer increased competitive pressure that reduces markups and improves efficiency and economies of scale The real question is how to manage outward oriented strategies so as to maximize the benefits of openness while minimizing risks This book aims to contribute to this important and ongoing policy debate bringing together recent empirical work on the trade collapse its causes and consequences and the broader trade policy agenda in the post crisis environment It addresses critical policy issues revolving around the topic of outward oriented growth strategy including policy instruments that help manage risks associated with outward orientation lessons learned from the crisis for particular countries and regions and how emerging trade policy issues such as climate change commodities global production networking and migration affect the prospects for recovery and outward oriented growth      **Pakistan & Gulf Economist** ,2004-07
