Messerle, 1965 Technical Assessment of Maglev System Concepts, 1998 The Government Maglev System Assessment Team operated from 1991 to 1993 as part of the National Maglev Initiative They assessed the technical viability of four U S Maglev system concepts using the French TGV high speed train and the German TR07 Maglev system as assessment baselines Maglev in general offers advantages that include high speed potential excellent system control high capacity low energy consumption low maintenance modest land requirements low operating costs and ability to meet a variety of transportation missions Further the U S Maglev concepts could provide superior performance to TR07 for similar cost or similar performance for less cost They also could achieve both lower trip times and lower energy consumption along typical U S routes These advantages result generally from the use of large gap magnetic suspensions more powerful linear synchronous motors and tilting vehicles Innovative concepts for motors guideways suspension and superconducting magnets all contribute to a potential for superior long term performance of U S Maglev systems compared with TGV and TR07 Reconsiderations on the Application of Dynamic Circuit Theory to the Calculation of Dynamic Properties in Electromagnetic Levitation Systems Knowles, Rolf Edward, 1979 *Circuit Theory and Design 85* Václav Zima, Josef Kvasil, 1985 Hardbound The organizers of ECCTD 85 have prepared a comprehensive program covering the broadest possible area of circuit theory and design Due to the close connection between circuit theory and signal theory speech processing and communication systems have also been included The papers have been selected on the basis of evaluation by three reviewers and are topically arranged as follows Analysis and design large network analysis layout statistical circuit design VLSI circuits CAD General network and system theory mathematical methods in system theory system theory biological system modelling nonlinear networks power microelectronics Communications radio and optical fibre communications systems electronic circuits for communications Discrete signal processing digital filters digital signal processing multidimensional filters and systems speech processing image processing Filters *Twelfth Midwest Symposium on Circuit Theory*, 1969 **Electric Circuits and Networks** K.
