Dynamics and Statistics in Engineering J. C. Das, 1994 **Engineering Mechanics statistics And Dynamics** Lakshmana, Intelligent Data Engineering and Automated Learning - IDEAL 2004 Zhen Rong Yang, Richard Everson, Hujun Yin, 2004-10-29 This book constitutes the refereed proceedings of the 5th International Conference on Intelligent Data Engineering and Automated Learning IDEAL 2004 held in Exeter UK in August 2004 The 124 revised full papers presented were carefully reviewed and selected from 272 submissions The papers are organized in topical sections on bioinformatics data mining and knowledge engineering learning algorithms and systems financial engineering and agent technologies

Statistical Dynamics and Reliability Theory for Mechanical Structures Valery A. Svetlitsky, 2012-12-06 The monograph text is based on lectures delivered by author during many years for students of Applied Mechanics Department of Bauman Moscow State Technical University The monograph includes also analytical results of scientific research obtained in collaboration with industry Progress in developing new equipment has called for a better understanding of the physical peculiarities pertaining to the action of designed structures in real conditions This is necessary for increasing the accuracy of the analysis and making these structures more reliable It has been found that classical determined perturbations are not principal and that determinism based methods of classical mechanics prove insufficient for understanding and explaining physical effects that arise at the operation of instruments located on moving objects the vibration of rocket engines the motion of a vehicle and the action of wind and seismic loads Therefore the necessity arose for devising a new physical model to analyze these dynamic processes and in particular for creating a new mathematical apparatus that would allow us to take into account non deterministic external excitations The theory of random processes that had been developed well enough as applied to problems of radio engineering and automatic control where the effect produced by random excitations appeared to be commensurable with that of deterministic excitations and where the ignoring of the random excitations would bring about incorrect results became such an apparatus **Intelligent Data Engineering and Automated Learning - IDEAL**

2009 Emilio Corchado, Hujun Yin, 2009-09-29 The IDEAL conference boasts a vibrant and successful history dating back to 1998 and this edition marked the 10 anniversary an important milestone demonstrating the increasing popularity and high quality of the IDEAL conferences Burgos the capital of medieval Spain and a lively city today was a perfect venue to celebrate such an occasion The conference has become a unique established and broad interdisciplinary forum for researchers and practitioners in many fields to interact with each other and with leading academics and industries in the areas of machine learning information processing data mining knowledge management bioinformatics neuroinformatics bio-inspired models agents and distributed systems and hybrid systems IDEAL 2009 received over 200 submissions After a rigorous peer review process the International Programme Committee accepted 100 high quality papers to be included in the conference proceedings In this 10th edition a special emphasis was given on the organization of workshops and special sessions Two workshops were

organized under the framework of IDEAL 2009 MIR Day 2009 and Nature Inspired Models for Industrial Applications Five special sessions were organized by leading researchers in their fields on various topics such as Soft Computing Techniques in Data Mining cent Advances on Swarm Based Computing Intelligent Computational Techniques in Medical Image Processing Advances on Ensemble Learning and Information Fusion and Financial and Business Engineering Modelling and Applications
