Dynamics Of Astrophysical Discs:

Dynamics of Astrophysical Discs J. A. Sellwood, 2004-01-22 Covers recent developments in both theory and observations of discs in a wide variety of astrophysical contexts The volume is based on a conference held at the University of Manchester in 1988 which brought together an international group of experts in a wide range of fields The papers cover planetary ring systems discs in star forming regions protoplanetary discs accretion and galaxy discs areas related by the remarkable similarity between the dynamical problems posed by each type of disc This will be a valuable reference work for researchers and postgraduate students in many branches of astronomy

Dynamics of Disc Galaxies Björn Sundelius, 1991 **Physics of Planetary Rings** Alexei M. Fridman, Nikolai N. Gorkavyi, 2013-04-17 Physics of Planetary Rings describes striking structures of the planetary rings of Saturn Uranus Jupiter and Neptune Narrow ringlets spiral waves and a chain of clumps The author has contributed essential ideas to the full understanding of planetary rings via the stability analysis of dynamical systems The combination of a high quality description the set of interesting illustrations as well as the fascinating and natural presentation will make this book of considerable interest to astronomers physicists and mathematicians as well as students There is no competing text for this book so far

Kovalenko, 2006-07-25 This book deals with collective and stochastic processes in astrophysical disks involving theory observations and the results of modelling It examines the spiral vortex structure in galactic and accretion disks and stochastic and ordered structures in developed turbulence The book advances the study in this important branch of astrophysics and will benefit professional researchers lecturers and graduate students

Fluid Dynamics and Dynamos in Astrophysics and Geophysics Andrew M. Soward, Christopher A. Jones, David W. Hughes, Nigel O. Weiss, 2005-03-16 The increasing power of computer resources along with great improvements in observational data in recent years have led to some remarkable and rapid advances in astrophysical fluid dynamics The subject spans three distinct but overlapping communities whose interests focus on 1 accretion discs and high energy astrophysics 2 solar stellar and From Protoplanetary Disks to Planet Formation Philip J. Armitage, Wilhelm Kley, 2019-02-02 Is the Sun and its planetary system special How did the Solar system form Are there similar systems in the Galaxy How common are habitable planets What processes take place in the early life of stars and in their surrounding circumstellar disks that could impact whether life emerges or not This book is based on the lectures by Philip Armitage and Wilhelm Kley presented at 45th Saas Fee Advanced Course From Protoplanetary Disks to Planet Formation of the Swiss Society for Astrophysics and Astronomy The first part deals with the physical processes occurring in proto planetary disks starting with the observational context structure and evolution of the proto planetary disk turbulence and accretion particle evolution and structure formation The second part covers planet formation and disk planet interactions This includes in detail dust and planetesimal formation growth to protoplanets terrestrial planet formation giant planet
