The book includes research on the following current topics in modern economic science: new challenges and opportunities for establishing information economies under the influence of scientific and technical advances; digital economy as a new vector of development of the modern global economy; economic and legal aspects of using new information and communication technologies in developed and developing countries; priorities of using the new information and communication technologies in modern economies; platforms of communication integration in tourism using new information and communication technologies; and economic and legal managerial aspects and peculiarities of scientific research on the information society.

*Achieving Financial Stability: Challenges To Prudential Regulation* Douglas D Evanoff, George G Kaufman, Agnese Leonello, Simone Manganelli, Douglas W Diamond, 2017-09-22. The Great Financial Crisis of 2007-2010 exposed the existence of significant imperfections in the financial regulatory framework that encouraged excessive risk taking and increased system vulnerabilities. The resulting high cost of the crisis in terms of lost aggregate income and wealth and increased unemployment has reinforced the need to improve financial stability within and across countries via changes in traditional microprudential regulation as well as the introduction of new macroprudential regulations. Amongst the questions raised are

**Digital Transformation and Sustainability of Business** Sai Kiran Oruganti, Dimitrios Karras, Srinesh Thakur, Janapati Krishna Chaithanya, Sukanya Metta, Amit Lathigara, 2025-05-20. It explores the integration of digital technologies into business models offering innovative approaches for sustainable growth. This comprehensive guide delves into case studies and strategic frameworks that align digital transformation with environmental and economic sustainability. It presents actionable insights on overcoming challenges, leveraging technology for efficiency, and fostering a competitive edge. Designed for industry leaders, researchers, and policymakers, the book provides evidence-based strategies supported by real-world applications, making it an essential resource for those looking to drive meaningful change in today's evolving business landscape.

*Climate Finance* Fei Wu, Dayong Zhang, Qiang Ji, 2024-07-27. This book focuses on the frontier issues in climate finance and aims to develop a general framework to understand the financial pathways towards a successful energy transition. It builds upon the general descriptions of the current status and future challenges towards carbon neutral targets and then brings forward a combination of theoretical and empirical analysis on the critical issues related to climate finance. Estimated by the International Energy Agency (IEA), trillions of dollars of investment in the energy sector are needed to achieve net zero emission scenario. It provides a huge opportunity for our economies meanwhile creates considerable

challenges to the existing system Both financing and investment in such an unprecedented scale cannot possibly be satisfied by the current financial architecture which creates demands for restructuring in the financial sector developing innovative financial instruments building mechanisms to attract private investment and establishing human resources to facilitate climate financing and investment This area is essentially interdisciplinary which requires a fundamental reconsideration of standard approaches Aiming to satisfy the broad interests from both academia and policymakers the contents of this book range from general discussions on critical issues to advanced statistical analyses on key topics Authors hope to bring forward a general picture about climate finance and facilitate the demands for both academic research and policymaking It should also provide a good guidance for graduate students interested in this subject The main contents of this book are based on solid research outcomes but with clear policy relevance The book combines finance theory and practices in both financial markets and energy sectors to reflect the complex nature of financing for energy transition While the materials can provide useful knowledge to policymakers the book can also inspire new research ideas in the relevant area

**Inflation Theory in Economics** Max Gillman, 2009-03-23 These essays bring together a progression in monetary theory The major theme that runs through all of the chapters is that in order to do monetary economics well in general equilibrium it helps to have a good money demand underlying the theory A proper underlying money demand sets up arguably the best foundation from which to make extensions of monetary economics from the basic model At the same time that money demand is modelled this also endogenizes the velocity of money This has been a challenge in the literature that these essays solve and then use to extend basic neoclassical growth and business cycle theory Solving this problem in a way that is a natural direct and micro founded extension of the standard monetary theory is the first major contribution of the collection The second major contribution is the extension of the neoclassical monetary models using this solution to reinvigorate classic issues of monetary economics and take them to the frontier
