UK Podcasting is now at a tipping point and ready to provide universal 24/7 access to learning. This book provides the background and an invaluable how-to guide. It deserves to be in every library and faculty office. Dr Bill Ashraf, Director of Technology Enhanced Learning, University of Sussex, UK. Given the dominance of text-based formats, this timely book demonstrates that media diversification is a MUST. Dr Thomas H. Ismann, Program Director of the Master of Distance Education, MDE, Carl von Ossietzky University, Oldenburg, Germany. Podcasting made easy does that sound like a contradiction in terms? Well, now you don't have to struggle with the technicalities because this book really does describe how easy it is to create and utilize podcasting in teaching. I thoroughly recommend it. TingTing Zeng, Learning Technologist, Imperial College, UK. While the book is a mine of information, both pedagogical and practical, it is the hands-on aspect that captured my heart. Clearly written by experts, the process of creating podcasts is described in an easy-to-understand, practical way that is accessible to novice and experienced podcast author alike. If you've been toying with the idea of podcasts, this is for you. If you've tried the basics and want to go the next step, this is for you. How to create Podcasts for Education will not merely be on your bookshelf; I predict that it will be well-thumbed. Ruth Brown, Academic Developer, Learning and Teaching Enhancement Unit, London South Bank University, UK. Further information on the theory and practice of podcasting can also be accessed on the dedicated website at www.podcastingforlearning.com.

Podcasting for Trainers and Educators, Digital Short Cut

Nandini Shastry, David P. Gillespie, 2003-09-11. This is the eBook version of the printed book **PODCASTING FOR TRAINERS AND Educators: A Digital SHORTCUT** by Nandini Shastry and David Gillespie. In many ways, trainers, educators, professors, teachers, instructors, SMEs, or course developers, whatever your title may be, if you are responsible for any knowledge transfer process, you are the people leading the way for corporations and educational institutions to forge into the new century. By learning about new technologies and learning and adapting them to our workplaces and our personal lives, we change the mindset, not to mention the productivity of the lives of those around us. At one time, it was the IT Department who were considered First Tier Adopters when it came to technology. Now, educators of all types have stepped into this role as well; we must learn it before we can teach it. It is our belief that podcasting is the next wave of technology that corporations and educational institutions can immediately use to solve a host of training and business problems. This book aims to show you the educator, whatever your title may be, how you'll learn what podcasting is, how to use it, what tools you'll need, free or inexpensive tools, as well as how to leverage podcasts in your own place of work and much more in easy-to-understand, non-technical terms. You'll also find in this book simulation, tutorials, and demos, free resources, free templates, sample communications for buy-in at your place of work, video testimonials from existing trainers, teachers, and professors. Dave and I have been involved in the areas of teaching, training, and knowledge management for many years. Dave has taught at the university level, and both of us have much experience with instructor-led training, e-learning, and a wide variety of tools from Macromedia Breeze and Captivate to Microsoft SharePoint and Live Meeting. We are excited about the possibilities that

The Pros and Cons of Using Chatbots Adrian Wallwork, 2025-11-09. Problem: The world has got itself in a muddle with AI and particularly with chatbots. There is a lot of misunderstanding and far too much focus on the supposed negative aspects: formulaic style of chatbot writing, bias inherent in many chatbot answers and generated texts, lack of inclusivity, educators mistaken thinking that they can intuitively tell the difference between a human generated text and a bot generated text, and that by default a human text is always better. Mistaken attitudes even among students themselves that using chatbots is a form of cheating rather than a highly effective study and teaching aid, too much faith given to AI detectors and too little understanding of how students are really using chatbots, i.e. mostly to advise, suggest and correct rather than generate. Solution and aims: The aim of the book is to give clear strategies for dealing with the negatives typically associated with chatbots and at the same time highlight the invaluable help that chatbots can give all types of users. Very often in the world of education both in English and non English speaking countries these features and strategies get overlooked. The book will teach readers strategies for distinguishing between human and AI generated texts in order to understand that both have their pros and cons: coaxing bots to produce more human like texts and at the same time detailing methods for acknowledging usage of bots in essays, assignments, papers etc; identifying bias in their own and AI generated texts and remedying this bias; avoiding plagiarism; avoiding being unjustly accused of AI usage; students avoiding unjustly accusing students of using AI inappropriately; teachers, professors, journal editors. The audience is thus not just non native speakers who were the main audience for the *English for Academic Research* series. Instead this book is aimed at everyone in education yet using the same user friendly structure that has become a hallmark of the *Academic Research* series. Outcomes: Teachers and professors will be better equipped to educate their students on how to use and not use chatbots. They will also learn that trusting their intuition with regard to whether a text was generated with a bot or whether their students have committed plagiarism is absolutely not failsafe and should be avoided. Students will be able to deal with the recognized challenges of using chatbots: ethics, bias, plagiarism, hallucinations and AI detection.
