failure Black Enterprise ,2008 **The role of language in the development of AI systems** Frank Born,2016-03-22
Bachelor Thesis from the year 2011 in the subject English Language and Literature Studies Linguistics grade 1 0 University
of Kassel course English and American Culture and Business Studies language English abstract AI is a fascinating topic that
not only baffled but also inspired the minds of philosophers scientists technicians and even movie makers Humans are
intrigued by the topic because the investigation of AI allows people to decipher the complexity of their own minds By trying
to create AI systems people create an insight into human intelligence as well as are able to understand the world that is
surrounding them New technologies enhance the possibilities to further meet human demands concerning computational
systems This reflects the ability of the systems to understand and analyze unstructured text The largest part of information
available is written in unstructured natural language AI systems can be used to make different types of information available
for present day demands Thoroughly examining Watson will reveal the similarities and differences of the way humans and
computational systems understand natural language This will create insight into the potential and further development of the
AI systems Natural language processing systems have a broad field of applications The demand of these systems becomes
instantly apparent when investigating various industries such as financial services call centers and the medical industry
Nevertheless Watson is not the only research program that will influence the future of society Various smaller software
programs will benefit and advance the current development Also knowledge representation will have an impact in areas such
as the World Wide Web One important aspect that should be considered when analyzing projects like Watson is the
opportunities that arise with it In the Art of War Sun Tzu states Know thine enemy better than one knows thyself
Investigating the Jeopardy challenge characterizes the battle between man and machine This leads to the conclusion that
understanding Watson allows to look at aspects of human intelligence that are still unraveled **Encyclopedia of Business
and Finance: A-I** Burton S. Kaliski,2007 Contains over 315 alphabetically arranged articles that provide information about
the major functional areas of business covering accounting economics finance information systems law management and
marketing as well as organizations in business and government and federal legislation **E-doc** ,2006 Learning
Languages Through Technology Elizabeth Hanson-Smith,Sarah Rilling,2006 While posing important questions about how
learning proceeds with new technologies this volume demonstrates how teachers captivate the imagination of learners from
school children to postgraduates by providing real world purposes for language The authors are from educational institutions
in many regions of the world and describe technology use from the lowest levels such as word processing and scanning to
high end multimedia and interactive communications through voice and video on the Internet Technology is perhaps the best
means to creating an environment conducive to language learning Technology can support teachers in making language
learning faster easier less painful and more engaging and helps create an optimal language learning environment Learning
Languages through Technology reflects the many and varied ways teachers are currently using computers and the Internet

and provides a rich resource for both novice and expert educator The volume is divided into four sections Language Development Online Skill Building through Technology Content Based and Task Based Learning Collaborative CALL Authentic Audience in a Web Based World Constructivism in Professional Development Features throughout the volume are helpful to pre and in service teachers each chapter opens with a preview of ideas to ponder before reading and each of the four sections begins with a preview of the chapters and concludes with a thought provoking issue in technology and pedagogy Follow up questions for class discussion further research and activities appear at the end of each section leading readers further into the discussion of the role technology plays in learning both currently and in the future Appendices list the tools software and Web sites helpful in using technology with learners **Library + Information Update** ,2005

Think Before You Like Guy P. Harrison,2017 Social media has pitfalls misinformation pseudoscience fraud and irrational beliefs presented in an attractive easy to share form It reinforces your biases by tracking your preferences it sends only filtered newsfeeds so that you rarely see anything that might challenge your set notions Harrison demonstrates how critical thinking can enhance the benefits of social media while giving readers the skills to guard against its dangers He also suggests ways to protect yourself against privacy invasion trolls and the confusion over fake news versus credible journalism
