Dolphin Societies Discoveries And Puzzles:

Dolphin Societies Karen Pryor, Kenneth S. Norris, 1991 A survey of current dolphin research Dolphin Mysteries Kathleen M. Dudzinski, 2008-10-14 Exciting new technologies and research methods help scientists unravel the mysteries of dolphin communication intelligence and culture Dolphins have fascinated humans for millennia giving rise to an abundance of stories and myths about them yet the actual details of their lives in the sea have remained elusive In this enthralling book Kathleen M Dudzinski and Toni Frohoff take us into the dolphins aquatic world to witness firsthand how they live their lives communicate and interact with one another and with other species including people Kathleen M Dudzinski and Toni Frohoff are scientists who have collectively dedicated more than 40 years to studying dolphins beneath the ocean s surface frequently through a close up underwater lens Drawing on their own experiences and on up to the minute research the authors show that dolphins are decidedly not just members of a group but distinct individuals able to communicate with one another and with humans Dudzinski and Frohoff introduce a new way of looking at and listening to the vocabulary of dolphins in the sea and they even provide an introductory dolphin dictionary listing complex social signals that dolphins use to share information among themselves and with people Unveiling an intimate and scientifically accurate portrait of dolphins this book will appeal to everyone who has wanted a closer glimpse into the hearts and minds of these amazing creatures **Are Dolphins Really Smart?** Justin Gregg, 2013-09-26 Justin Gregg weighs up the claims made about dolphin intelligence and separates scientific fact from fiction *Collected Reprints* Southwest Fisheries Center (U.S.), 1993 **Coastal Dolphins and Porpoises** Thomas Allen Jefferson, 2024-12-08 Coastal Dolphins and Porpoises Ridgway and Harrison s Handbook of Marine Mammals Volume One the first volume in the Handbook of Marine Mammals series covers some of the world s most beautiful intelligent and highly adapted mammals that inhabit our seas and oceans As our knowledge of marine mammals grows the need exists for a reliable and complete reference to the ecology and biology of these fascinating creatures Scientists conservationists and informed laypersons will find books in this series to be a definitive review of all the world s living whales dolphins porpoises seals sea lions sea cows and marine otters and bears This volume consists of species review chapters written by leading global experts on a variety of coastal marine species of dolphins and porpoises Each chapter includes a description of the species followed by sections on distribution and abundance anatomy physiology behavior ecology reproduction parasites diseases and the impacts of human activities on the species Provides in depth reviews of bottlenose humpback and other coastal dolphins as well as the closely related porpoises Addresses the evolution anatomy ecology distribution and behavior of these marine mammal species Features numerous photos of live and specimen animals skulls and anatomical details along with distribution maps **Biological Exuberance** Bruce Bagemihl, 1999-01-15 Lavishly illustrated and meticulously researched filled with fascinating facts and astonishing descriptions of animal behavior Biological Exuberance is a groundbreaking book that explodes the myth that homosexuality is not frequently found in nature

Handbook of Marine Mammals Sam H. Ridgway, Richard John Harrison, 1998-09-23 Twenty three separate papers each describing a single species **Canadian Journal of Zoology**, 2008 *Bottlenose Dolphin Training and Interaction* Deborah Nuzzolo, 2003-06 Discusses how the bottlenose dolphin interacts with one another and how they are trained in aquariums and aquatic animal parks **Journal of Experimental Biology**, 2006 *Tectonic Evolution and Midplate Volcanism in the South Pacific* Kelsey Allyn Jordahl, 1999 Changes in morphology of the Marquesas Fracture Zone are correlated with small changes in Pacific Farallon relative motion The simple flexural signal of a locked fracture zone may be obscured by tectonic effects and there is no evidence for the release of shear stress on the fracture zone by vertical slip after leaving the active transform One such small change in plate motion is documented in the South ern Austral Island region of the South Pacific A twelve degree clock wise change in Pacific Farallon relative motion occurred around fifty million years ago This Eocene change in spreading direction and rate is locally constrained with observations of magnetic anomalies and spreading fabric orientation At the southeastern end of the Cook Austral Island chain multiple episodes of volcanism have left a diverse population of seamounts Volume estimates from geophysical data and modeling show that one half to two thirds of the volcanic material is over thirty million years old while the remainder is less than five million years old Seismic and bathymetric data imply the presence of abyssal basalt flows in the flexural moat of the Austral Islands probably associated with Austral Islands volcanism which may contribute a significant amount of material to the archipelagic apron

Bioacoustics, 1999 *Soundings*, 2001 *Behavior of Bottlenose (Tursiops Truncatus) and Spotted (Stenella Frontalis) Dolphins Relative to Human Interaction* Toni Gudish Frohoff, 1996 **The Cumulative Book Index**, 1991 A world list of books in the English language **Between Species** Toni Frohoff, Brenda Peterson, 2003 Since ancient times the kinship between dolphins and humans has been celebrated across cultures and continents in myth art literature and science Only recently however have we gone beyond our own view of this interspecies connection and begun to ask What might this bond look like from the dolphins perspective This anthology brings together for the first time eminent scientists and gifted writers to help shed light on this intriguing question Selections range from tales of transforming dolphin encounters to views on how to protect cetaceans and their habitats and from poems honoring dolphins to provocative critiques of swim with the dolphins programs and acoustic pollution From publisher description *Sound Use, Sequential Behavior and Ecology of Foraging Bottlenose Dolphins, Tursiops Truncatus* Douglas Paul Nowacek, 1999 Odontocetes are assumed to use echolocation for navigation and foraging but neither of these uses of biosonar has been conclusively demonstrated in free ranging animals A new observation platform combining underwater acoustic recording and a remote controlled video camera suspended from a tethered airship allowed me to describe previously unreported foraging behaviors and elucidate functions for behaviors already defined but poorly understood A single step transition analysis beginning with prey capture and receding in time identified significant links between observed behaviors and prey capture Ecological factors affecting the occurrence of

specific behaviors and behavioral transitions include mesoscale habitat variation and individual preferences The role of sound in foraging especially echolocation is less well understood than the behavioral component Acoustic recordings revealed that single animals are much more vocal than animals in groups both overall and during foraging For single foraging animals the use of whistles and pops varied significantly by habitat but echolocation occurred consistently throughout foraging sequences and across habitat types Acoustic data were also collected with a newly developed tag that recorded all sounds produced by an individual Low overall click and whistle rates were recorded with both occurring in bouts separated by relatively long periods of silence

Kenneth S. Norris Kenneth Stafford Norris, 2010 Kenneth Norris was an historian in the tradition of Aldo Leopold He was the father of American marine mammology and discovered much of what we know about the social life of dolphins and whales This title includes an oral history with Norris as well as his collection of research interests in desert biology herpetology and marine mammology
