Due Voci:

The Solfeggio Tradition Nicholas Baragwanath, 2020-10-02 How did castrati manage to amaze their eighteenth century audiences by singing the same aria several times in completely different ways And how could composers of the time write operas in a matter of days The secret lies in the solfeggio tradition a music education method that was fundamental to the training of European musicians between 1680 and 1830 a time during which professional musicians belonged to the working class As disadvantaged children in orphanages learned the musical craft through solfeggio lessons many were lifted from poverty and the most successful were propelled to extraordinary heights of fame and fortune In this first book on the solfeggio tradition author Nicholas Baragwanath draws on over a thousand manuscript sources to reconstruct how professionals became skilled performers and composers who could invent and modify melodies at will By introducing some of the simplest exercises in scales leaps and cadences that apprentices would have encountered this book allows readers to retrace the steps of solfeggio training and learn to generate melody by speaking it like an eighteenth century musician As it takes readers on a fascinating journey through the fundamentals of music education in the eighteenth century this book uncovers a forgotten art of melody that revolutionizes our understanding of the history of music pedagogy *Aspects of the Secular Cantata in Late Baroque Italy* Michael Talbot, 2017-07-05 As shown by the ever increasing volume of recordings editions and performances of the vast repertory of secular cantatas for solo voice produced primarily in Italy in the second half of the seventeenth century and the first half of the eighteenth century this long neglected genre has at last come of age However scholarly interest is currently lagging behind musical practice incredibly there has been no general study of the Baroque cantata since Eugen Schmitz's handbook of 1914 and although many academic theses have examined microscopically the cantatas of individual composers there has been little opportunity to view these against the broader canvas of the genre as a whole The contributors in this volume choose aspects of the cantata relevant to their special interests in order to say new things about the works whether historical analytical bibliographical discographical or performance based The prime focus is on Italian born composers working between 1650 and 1750 thus not Handel but the opportunity is also taken in one chapter by Graham Sadler to compare the French cantata tradition with its Italian parent in association with a startling new claim regarding the intended instrumentation Many key figures are considered among them Tomaso Albinoni Giovanni Bononcini Giovanni Legrenzi Benedetto Marcello Alessandro Scarlatti Alessandro Stradella Leonardo Vinci and Antonio Vivaldi The poetic texts of the cantatas all too often treated as being of little intrinsic interest are given their due weight Space is also found for discussions of the history of Baroque solo cantatas on disc and of the realization of the continuo in cantata arias a topic more complex and contentious than may at first be apparent The book aims to stimulate interest in and to win converts to this genre which in its day equalled the instrumental sonata in importance and in which more than a few composers invested a major part of their creativity **Catalogue of Printed Music Published**

Between 1487 and 1800 Now in the British Museum: L-Z and First supplement British Museum. Department of Printed Books, William Barclay Squire, 1912 Antonio Gardano, Venetian Music Printer, 1538-1569 Mary Lewis, 1997-10-01 Antonio Gardano's publications are among the most important sources of 16th century music. The second volume describes the output of this leading Italian music press in its cultural, bibliographical and musical context. The first part of the book consists of an overview of Gardano's repertory from the fifties and the cultural and musical milieu in which he worked. It includes discussions of the continuing popularity of his earlier repertory, the music of the younger generation introduced in the fifties, the music of the composers around San Marco and genres such as the multi-movement madrigal, the canzoni villanesche, instrumental works and new anthologies. Also discussed are the dating of some undated editions, unconfirmed and doubtful prints and ordering within the editions. A chapter on binder's copies describes groups of editions bound together by their early owners and serves as a valuable index to the tastes of the collectors. The catalog section covers all Gardano's known publications of the fifties and provides full titles, bibliographical information, contents with concordant sources for each piece and locations of individual copies with notes on their bindings, owners' marks, annotations and other significant characteristics. The catalog is indexed by composer, first line and short title and includes a list of primary and secondary sources consulted.
