Duel Between The First Ironclads:

Duel Between the First Ironclads William C. Davis, 2012-05-09 One was called a tin can on a shingle the other a half submerged crocodile Yet on a March day in 1862 in Hampton Roads Virginia after a five hour duel the U S S Monitor and the C S S Virginia formerly the U S S Merrimack were to change the course of not only the Civil War but also naval warfare forever Using letters diaries and memoirs of men who lived through the epic battle of the Monitor and the Merrimack and of those who witnessed it from afar William C Davis documents and analyzes this famous confrontation of the first two modern warships The result is a full scale history that is as exciting as a novel Besides a thorough discussion of the designs of each ship Davis portrays some of the men involved in the building and operation of America's first ironclads John Ericsson supreme egoist and engineering genius who designed the Monitor John Brooke designer of the Virginia John Worden the well loved captain of the Monitor Captain Franklin Buchanan of the Virginia and a host of other men on both Union and

Confederate sides whose contributions make this history as much a story of men as of ships and war **Hampton Roads 1862** Angus Konstam, 2002-04-25 This Osprey title examines the first naval conflict of the American Civil War 1861-1865 On 9 March 1862 the world's first battle between two ironclad warships took place in the confined waters of Hampton Roads Virginia The previous day the Confederate ironclad CSS Virginia impervious to her enemy's guns had sunk two Union warships When she re-emerged from Norfolk to complete the destruction of the Union blockading squadron the USS Monitor steamed out to meet her The four hour duel that ensued was a stalemate but crucially the Virginia had failed to break the Northern blockade of the Southern ports Nevertheless in a single battle these two vessels rendered wooden warships obsolete and transformed the face of naval warfare forever Decision at Sea Craig L. Symonds, 2005-06-10 From thunderous broadsides traded between wooden sailing ships on Lake Erie to the carrier battles of World War II to the devastating high tech action in the Persian Gulf here is a gripping history of five key battles that defined the evolution of naval warfare and the course of the American nation Acclaimed military historian Craig Symonds offers spellbinding narratives of crucial engagements showing how each battle reveals the transformation of technology and weaponry from one war to the next how these in turn transformed naval combat and how each event marked a milestone in American history Oliver Hazard Perry's heroic victory at Lake Erie one of the last great battles of the Age of Sail which secured the Northwestern frontier for the United States The brutal Civil War duel between the ironclads Monitor and Virginia which sounded the death knell for wooden hulled warships and doomed the Confederacy's hope of besting the Union navy Commodore Dewey's stunning triumph at Manila Bay in 1898 where the U S displayed its new navy of steel hulled ships firing explosive shells and wrested an empire from a fading European power The hairsbreadth American victory at Midway where aircraft carriers launched planes against enemies 200 miles away and where the tide of World War II turned in the space of a few furious minutes Operation Praying Mantis in the Persian Gulf where computers ship fired missiles and smart

bombs not only changed the nature of warfare at sea but also marked a new era and a new responsibility for the United States Symonds records these encounters in detail so vivid that readers can hear the wind in the rigging and feel the pounding of the guns Yet he places every battle in a wide perspective revealing their significance to America s development as it grew from a new Republic on the edge of a threatening frontier to a global superpower Decision at Sea is a powerful and illuminating look at pivotal moments in the history of the Navy and of the United States It is also a compelling study of the unchanging demands of leadership at sea where commanders must make rapid decisions in the heat of battle with lives and the fate of nations hanging in the balance

The Civil War at Sea Craig L. Symonds, 2009-08-25 This work provides an assessment of the crucial roles played by the Union and Confederate navies in the Civil War From Craig Symonds author of the 2009 Lincoln Prize award winner *Lincoln and His Admirals* comes a fascinating look at the era when American naval power came of age Thoroughly researched and excitingly written it brings to light a wealth of new information on a pivotal aspect of the Civil War The Civil War at Sea covers navies on both sides of the conflict examining key issues such as the impact of emergent technologies the effectiveness of the Union s ambitious strategy of blockading the odyssey of Confederate commerce raiders the role of naval forces on the western rivers and the difficulty of conducting combined sea and ground operations against the major Southern port cities For Civil War buffs fans of military and technological history and other interested readers it is insightful essential reading

The Civil War Naval Encyclopedia Spencer C. Tucker, 2010-12-09 Long overlooked in favor of land engagements this is the first encyclopedia to analyze the naval aspects of the American Civil War The brilliance of both sides secretaries of the navy Stephen Mallory and Gideon Welles The Dahlgren guns of the Union forces and the Confederate Navy s Brooke guns that were essential in battles involving ironclad ships The significant contributions of African Americans in the ship crews of the U S Navy during the Civic War These are examples of the fascinating details contained in The Civil War Naval Encyclopedia that provide readers with a complete understanding of the naval aspects of the American Civil War The entries in this sweeping text provide comprehensive treatment of overall strategies on each side the role of diplomacy leading naval officers and other personalities battles and important engagements ship types well known individual warships naval ordnance and weapons systems and new developments such as mines and submarines Topics such as shipboard life major waterways prominent seaports and the role of logistics in determining the outcome of the war are also covered

War on the Waters James M. McPherson, 2012-09-17 Although previously undervalued for their strategic impact because they represented only a small percentage of total forces the Union and Confederate navies were crucial to the outcome of the Civil War In *War on the Waters* James M. McPherson has crafted an enlightening at times harrowing and ultimately thrilling account of the war s naval campaigns and their military leaders McPherson recounts how the Union navy s blockade of the Confederate coast leaky as a sieve in the war s early months became increasingly effective as it choked off vital imports and exports Meanwhile the Confederate navy dwarfed by its giant

adversary demonstrated daring and military innovation Commerce raiders sank Union ships and drove the American merchant marine from the high seas Southern ironclads sent several Union warships to the bottom naval mines sank many more and the Confederates deployed the world's first submarine to sink an enemy vessel But in the end it was the Union navy that won some of the war's most important strategic victories as an essential partner to the army on the ground at Fort Donelson Vicksburg Port Hudson Mobile Bay and Fort Fisher and all by itself at Port Royal Fort Henry New Orleans and Memphis

Jefferson Davis, Confederate President Herman Hattaway, Richard E. Beringer, 2002 Now two Civil War historians Herman Hattaway and Richard Beringer take a new and closer look at Davis's presidency In the process they provide a clearer image of his leadership and ability to handle domestic diplomatic and military matters under the most trying circumstances without the considerable industrial and population resources of the North and without the formal recognition of other nations

BOOK JACKET *The Man Who Made the Monitor* Olav Thulesius, 2006-12-12 Mention Civil War naval confrontations and the Monitor instantly springs to mind The first of the ironclads the Monitor not only took part in a major battle it forever changed the face of naval construction But who was the man behind the ship Born in Filipstad Sweden in 1803 the brilliant and somewhat eccentric engineer John Ericsson spent his childhood observing his father's work in mining and later learned his engineering skills at the North Atlantic Baltic canal As a young man Ericsson turned to a variety of projects In England he introduced the ship's propeller built an Arctic expedition vessel and designed some of the first successful steam locomotives Moving to New York in 1839 he soon teamed up with Harry Cornelius Delameter of the Phoenix foundry a partnership which resulted in Ericsson's most famous work the USS Monitor Focusing on the man behind the inventions this book tells the life story of John Ericsson It details a number of Ericsson's inventions including a steam powered fire engine the first screw propelled warship a variety of hot air engines and early experiments in solar power from the roof of his Manhattan home The main focus is Ericsson's design and construction of the ironclad USS Monitor One of the first viable armored warships the Monitor revolutionized naval warfare the world over The ship's battle with the CSS Virginia at Hampton Roads and its eventual fate off the coast of Cape Hatteras are covered Ericsson's relationships with contemporaries such as Alfred Nobel and recent developments concerning the recovery of the wreck of the Monitor are also examined

Joseph E. Johnston and the Defense of Richmond Steven H. Newton, 1998 Focusing on the period between mid February and late May 1862 Newton examines in detail the high level conferences in Richmond to set strategy and the relationship of the Peninsula campaign to operations in the Shenandoah Valley and the western Confederacy By examining what Joseph E Johnston actually accomplished rather than speculating on what he might have done Newton shows that his overall conduct of the campaign holds up well under scrutiny

Jacket *Union And Confederate Submarine Warfare In The Civil War* Mark K. Ragan, 1999-11-21 Submarine use and experimentation during the Civil War was far more widespread than generally known Drawing on years of archival research submarine expert Mark Ragan outlines the building programs
