Integrating Outcome Research Into Counseling Practice and Training Thomas L. Sexton, 1997 The systematic study of counseling occupies a curious position although a large quantity of research based knowledge exists practitioners continue to perceive research as irrelevant. Ways that research and practice can be systematically linked are explored in this book. The goal of the text is to present information on counseling as a process irrespective of its theoretical and professional alliances. The volume is divided into three parts. Part 1 forms the foundation of the book and presents an analysis of the major criticisms of outcome research along with a brief overview of the unique nature of counseling outcome research. The four chapters in Part 2 focus on the application of current research based knowledge to the practice of counseling. Conclusions and recommendations are offered that are deemed representative of stable trends in the body of outcome research with an emphasis on behavior change across settings and focal areas. Part 3 addresses the integration of research into practice. Practical techniques that practitioners and researchers can use are explored and a pragmatic model of the systematic relationship between counseling research and practice is presented. A model of action to help make research a regular part of daily counseling practice is also provided. Contains an index and approximately 550 references. RJM Psychotherapy and Counseling William S.
