

# Sustainability

- A contested term with a history
- From 1712 forestry usage to wider currency in the 1980s
- Linking of environmental questions to mainstream issues of economy and development: *'Sustainable development is development that meets the needs of the present without compromising the ability of future generations to meet their own needs'* (Brundtland 1987)
- Vibrant, committed debate at and around Rio 1992: economics and political science, broad and narrow, strong and weak, top-down and community-defined... Technical meanings co-constructed with different visions for how sustainability should be achieved
- Through 1990s, growth in planning approaches, frameworks, measurement indicators, audit systems, evaluation protocols – managerialism and bureaucratisation
- Discrediting of 'sustainability'? (empty rhetoric, failure of managerialism, conservatism, inadequacy of institutional and policy machinery)
- Yet sustainability is the 'keyword' for Rio plus 20 amidst complex environment-development challenges – more of the same?
