Advances in Software Engineering Changhoon Lee,2009-11-02 As software engineering SE becomes specialized and fragmented it is easy to lose sight that many topics in SE have common threads and because of this advances in one sub discipline may transmit to another The presentation of results between different sub disciplines of SE encourages this interchange for the advancement of SE as a whole Of particular interest is the hybrid approach of combining ideas from one discipline with those of another to achieve a result that is more significant than the sum of the individual parts Through this hybrid philosophy a new or common principle can be discovered which has the propensity to propagate throughout this multifaceted discipline This volume comprises the selection of extended versions of papers that were presented in their shortened form at the 2008 International Conference on Advanced Software Engineering and Its Applications <http://www.sersc.org/ASEA2008> and 2009 Advanced Science and Technology <http://www.sersc.org/AST2009> We would like to acknowledge the great effort of all in the ASEA 2008 and AST 2009 International Advisory Board and members of the International Program Committee as well as all the organizations and individuals who supported the idea of publishing these advances in software engineering including SERSC <http://www.sersc.org> and Springer We would like to give special thanks to Rosslin John Robles Maricel O Balitanas Farkhod Alisherov Alisherovich Feruza Sattarova Yusfovna These graduate school students of Hannam University attended to the editing process of this volume with great passion
