Dynamics In Several Complex Variables:

Dynamics in Several Complex Variables John Erik Fornæss, 1996 This CBMS lecture series held in Albany New York in June 1994 aimed to introduce the audience to the literature on complex dynamics in higher dimension Some of the lectures are updated versions of earlier lectures given jointly with Nessim Sibony in Montreal 1993 the author's intent in this book is to give an expansion of the Montreal lectures basing complex dynamics in higher dimension systematically on pluripotential theory [Dynamics in Several Complex Variables](#), 1995 This CBMS lecture series held in Albany New York in June 1994 aimed to introduce the audience to the literature on complex dynamics in higher dimension Some of the lectures are updated versions of earlier lectures given jointly with Nessim Sibony in Montreal 1993 The author's intent in this book is to give an expansion of the Montreal lectures basing complex dynamics in higher dimension systematically on pluripotential theory These notes provide an easy to read introduction into the field an introduction that motivates the topics The monograph then points readers towards technically more advanced topics [Algebraic and Geometric Dynamics in Several Complex Variables](#) Marius V. Dabija, 2000 **Holomorphic Dynamical Systems** Nessim Sibony, Dierk Schleicher, Dinh Tien Cuong, Marco Brunella, Eric Bedford, Marco Abate, 2010-07-20 The theory of holomorphic dynamical systems is a subject of increasing interest in mathematics both for its challenging problems and for its connections with other branches of pure and applied mathematics A holomorphic dynamical system is the datum of a complex variety and a holomorphic object such as a self map or a vector field acting on it The study of a holomorphic dynamical system consists in describing the asymptotic behavior of the system associating it with some invariant objects easy to compute which describe the dynamics and classify the possible holomorphic dynamical systems supported by a given manifold The behavior of a holomorphic dynamical system is pretty much related to the geometry of the ambient manifold for instance parabolic manifolds do not admit chaotic behavior while projective manifolds have a variety of different chaotic pictures The techniques used to tackle such problems are of various kinds complex analysis methods of real analysis pluripotential theory algebraic geometry differential geometry topology To cover all the possible points of view of the subject in a unique occasion has become almost impossible and the CIME session in Cetraro on Holomorphic Dynamical Systems was not an exception *Dynamics in Several Complex Variables: Endomorphisms in Projective Spaces and Polynomial-like Mappings* Tien-Cuong Dinh, Nessim Sibony, 2008 [Differentiable and Complex Dynamics of Several Variables](#) Pei-Chu Hu, Chung-Chun Yang, 1999-07-31 This book gives a comprehensive and up to date survey on dynamics and related topics such as Fatou Julia type theory the Ergodic theorem and invariant sets hyperbolicity in differentiable or complex dynamics iteration theory on \mathbb{P}^m complex dynamics in \mathbb{C}^m and the foundations of differentiable and complex dynamics The main aims of this volume are firstly to advance the study of the above named topics and to establish the corresponding Fatou Julia results for complex manifolds and secondly to provide some advanced account of dynamical systems within the framework of geometry and analysis presented from a unified approach applicable to both real

and complex manifolds Audience This work will be of interest to graduate students and researchers involved in the fields of global analysis analysis on manifolds several complex variables and analytic spaces partial differential equations differential geometry measure and integration **Equivalences of Holomorphic Mappings in One and Several Complex Variables** Adrian Jenkins,2005 *Dynamics of Algorithms* Rafael de la Llave,Linda R. Petzold,Jens Lorenz,2012-12-06 The articles collected in this volume represent the contributions presented at the IMA workshop on Dynamics of Algorithms which took place in November 1997 The workshop was an integral part of the 1997 98 IMA program on Emerging Applications of Dynamical Systems The interaction between algorithms and dynamical systems is mutually beneficial since dynamical methods can be used to study algorithms that are applied repeatedly Convergence asymptotic rates are indeed dynamical properties On the other hand the study of dynamical systems benefits enormously from having efficient algorithms to compute dynamical objects *Complex Dynamical Systems and the Geometry of Domains in Banach Spaces* Mark Elin,Simeon Reich,David Shoiykhiet,2004 Function Theory of Several Complex Variables Steven George Krantz,2001 Emphasizing integral formulas the geometric theory of pseudoconvexity estimates partial differential equations approximation theory inner functions invariant metrics and mapping theory this title is intended for the student with a background in real and complex variable theory harmonic analysis and differential equations *Dynamical Studies in Several Complex Variables* Mattias Jonsson,Kungliga tekniska högskolan.
