Dynamics Of Compliance Supreme Court Decision Making From A New Perspective:

How Courts Impact Federal Administrative Behavior Robert J. Hume, 2009-05-07 What impact do federal courts have on the administrative agencies of the federal government How do agencies react to the decisions of federal courts This book answers these questions by examining the responses of federal agencies to the U S Courts of Appeals revealing what happens inside agencies after courts rule against them Robert J Hume draws upon dozens of interviews with current and former administrators taking readers behind the scenes of these organizations to reveal their internal procedures their attitudes about courts and their surprising capacity to be influenced by a judge s choice of words This fascinating study will be of interest to students and scholars of politics as well as those seeking great understanding of the intricacies of the US political system *The Dynamics of Compliance* Richard M. Johnson, 1967 Study of transmission and public compliance with rulings of the U S Supreme Court through the case history of a school prayer issue in a community in Illinois *Jsl Vol 21-N1* JOURNAL OF SCHOOL LEADERSHIP, 2011-02-16 The Journal of School Leadership is broadening the conversation about schools and leadership and is currently accepting manuscripts We welcome manuscripts based on cutting edge research from a wide variety of theoretical perspectives and methodological orientations The editorial team is particularly interested in working with international authors authors from traditionally marginalized populations and in work that is relevant to practitioners around the world Growing numbers of educators and professors look to the six bimonthly issues to deal with problems directly related to contemporary school leadership practice teach courses on school leadership and policy use as a quality reference in writing articles about school leadership and improvement *In Defense of a Political Court* Terri Jennings Peretti, 2001-10-29 Can the Supreme Court be free of politics Do we want it to be Normative constitutional theory has long concerned itself with the legitimate scope and limits of judicial review Too often theorists seek to resolve that issue by eliminating politics from constitutional decisionmaking In contrast Terri Peretti argues for an openly political role for the Supreme Court Peretti asserts that politically motivated constitutional decisionmaking is not only inevitable it is legitimate and desirable as well When Supreme Court justices decide in accordance with their ideological values or consider the likely political reaction to the Court s decisions a number of benefits result The Court s performance of political representation and consensus building functions is enhanced and the effectiveness of political checks on the Court is increased Thus political motive in constitutional decision making does not lead to judicial tyranny as many claim but goes far to prevent it Using pluralist theory Peretti further argues that a political Court possesses instrumental value in American democracy As one of many diverse and redundant political institutions the Court enhances both system stability and the quality of policymaking particularly regarding the breadth of interests represented *Judicial Power and Strategic Communication in Mexico* Jeffrey K. Staton, 2010-03-22 Although they are not directly accountable to voters constitutional court judges communicate with the general public through the media In *Judicial Power and Strategic Communication in Mexico* Jeffrey K Staton argues that

constitutional courts develop public relations strategies in order to increase the transparency of judicial behavior and promote judicial legitimacy Yet in some political contexts there can be a tension between transparency and legitimacy and for this reason courts cannot necessarily advance both conditions simultaneously The argument is tested via an analysis of the Mexican Supreme Court during Mexico's recent transition to democracy and also through a cross national analysis of public perceptions of judicial legitimacy The results demonstrate that judges can be active participants in the construction of their own power More broadly the study develops a positive political theory of institutions which highlights the connections between democratization and the rule of law

Governing With the News, Second Edition Timothy E. Cook, 2012-08-06

The ideal of a neutral objective press has proven in recent years to be just that an ideal In *Governing with the News* Timothy E. Cook goes far beyond the single claim that the press is not impartial to argue that the news media are in fact a political institution integral to the day to day operations of our government This updated edition includes a new afterword by the author which pays close attention to two key developments in the twenty first century the accelerating fragmentation of the mass media and the continuing decline of Americans confidence in the press Provocative and often wise Cook who has a complex understanding of the relationship between governing and the news provides a fascinating account of the origins of this complicity James Bennet Washington Monthly *Governing with the News* addresses central issues of media impact and power in fresh illuminating ways Cook mines a wealth of historical and organizational literature to assert that the news media are a distinct political institution in our democratic system Robert Schmuhl *Commonweal*

Political And Legal Obligation James Roland Pennock, John William Chapman, At a point in history marked by dramatic challenges to the existing political and social order the question of legal and political obligation emerges as a focal point of international concern Amid the clamor for radical change in the established order theories of political obligation demand renewed examination In this volume eighteen leading specialists in the legal philosophical and political science aspects of the question offer their views on this timely topic Part I examines the nature of moral legal and political obligation The first essay presents a set of definitions that denies the very existence of obligation The second essay disagrees particularly with respect to the relationship of political to moral tenets and the third discusses the highly complex interplay between law and morality Part II takes up the conditions of obligation and of obedience The first essay in this part discusses the conditions necessary to generate a felt obligation The second paper concentrates on exposing key obstacles to the empirical proof that behavior is or is not motivated by felt obligation While the third draws upon a large body of literature and court decisions dealing with compliance to the law The fourth essay is a case study of Rome probing the role of obligation during that city's seven centuries of existence without a police force and the ultimate breakdown of the system Part III highlights ethical considerations that arise out of civil disobedience The first essay proposes a rather restrictive definition of civil disobedience and then embarks on a surprising examination of this subject in the light of the traditional arguments for just war Following

that is a broader examination of disobedience emphasizing a contextual approach and applying as a test the likelihood of public good that will result from disobedience Scholars and students in the areas of law philosophy and political science will find this volume a vital addition to their libraries

To Build a Wall Gregg Ivers, 1995 *To Build a Wall* represents the first extensive study of the effect of Jewish interest groups on church state litigation Ivers carefully traces the evolution of the American Jewish Committee the American Jewish Congress and the ADL from benevolent social service agencies to powerful organized interest groups active on all fronts of American politics and public affairs He draws extensively upon original sources and archival materials from each organization personal interviews over a five year period as well as the personal files and papers of Leo Pfeffer the lead counsel or amicus curiae in nearly every establishment clause case from the late 1940s through the early eighties Ivers concludes that organized interests can and do have critical influence in the legal process but that organizational needs and external demands result in a more ad hoc less planned approach to law and litigation than much previous scholarship has suggested Ivers also argues that the ethnic economic and religious differences that led to the formation of competing Jewish organizations eighty years ago continue to drive a dynamic pluralism within the Jewish community manifest in part in divergent approaches to litigation and public affairs

Governing with the News Timothy E. Cook, 1998-02-17 From the opening decades of the republic when political parties sponsored newspapers to current governmental practices that actively subsidize the collection and dissemination of the news the press and the government have been far from independent Unlike those earlier days however the news is no longer produced by a diverse range of individual outlets but is instead the result of a collective institution that exercises collective power In explaining how the news media of today operate as an intermediary political institution akin to the party system and interest group system Cook demonstrates how the differing media strategies used by governmental agencies and branches respond to the constitutional and structural weaknesses inherent in a separation of powers system Cook examines the news media's capacity to perform the political tasks that they have inherited and points the way to a debate on policy solutions in order to hold the news media accountable without treading upon the freedom of the press

No Longer Disabled Susan Mezey, 1988-06-20 This book focuses on the Reagan administration's broad attempt from 1980 to 1984 to strike thousands of Social Security disability recipients from government rolls Mezey enriches her study with a brief history of federal disability policy and provides a review of contending arguments over public policy and judicial activism Of particular interest is the legal battle over the medical criteria used for determining disability and the SSA's deliberate policy of nonacquiescence when confronted with adverse judicial rulings A well documented and valuable addition to case studies on the Reagan administration's efforts to cut human services Choice This book is a case study of judicial policy making It focuses on the role of adjudication in the making and refining of federal policy It goes beyond the scope of most treatments of social security and the disability policy to examine the stages of judicial review and subsequent legislative and bureaucratic responses to adjudication It then proceeds

to analyze the resulting changes in legislative policies The study is devoted to two themes First it provides an opportunity for empirical analysis of the role of the lower federal courts in the policy making arena second it examines the role of litigation as a political activity This issue serves as a timely opportunity to explore the impact of federal courts on bureaucratic and congressional policies by focusing on the interactions of institutions involved in the disability policy making process By examining the effects of the courts on social policy this case study offers new perspectives on the role of the federal courts in the political system
