**Personalization and Digital Social Markets** Tahir M. Nisar, 2025-01-09 Tahir Nisar presents a cogent, compelling account of recent developments and disruptions within the digital economy and particularly within the industrial and service sectors. Through an original, overarching framework rooted in the concept of personalization and its antecedents, Nisar identifies radically new forms of relationships, both economic and social, among firms and customers. These new relationships are driving major changes in commercial and industrial firms' policies and practices and, in turn, in the entire market economy. E-commerce, trading, user-generated content, virtual communities, co-creation, influencer movements, FinTech and sharing economies have strengthened the hands of consumers and have encouraged developments in cognitive technologies such as AI automation, which in turn create new ways of working and disruptions to traditional capital-labour relations. Ultimately, what emerges from this study is a picture of how digital technologies unleash forces of change that are creating new forms of social and economic sharing arrangements and new forms of social organization. For its empirical depth and theoretical rigor, this
