Allan Kulikoff s provocative new book traces the rural origins and growth of capitalism in America challenging earlier scholarship and charting a new course for future studies in history and economics Kulikoff argues that long before the explosive growth of cities and big factories capitalism in the countryside changed our society the ties between men and women the relations between different social classes the rhetoric of the yeomanry slave migration and frontier settlement He challenges the received wisdom that associates the birth of capitalism wholly with New York Philadelphia and Boston and show how studying the critical market forces at play in farm and village illuminates the defining role of the yeomen class in the origins of capitalism *Equality and the City* Enrique Peñalosa Londoño, 2024-04-16 In Equality and the City Enrique Peñalosa Londoño draws on his experience as mayor of Bogotá Colombia as well as his many years of international work as a lecturer and consultant to share his perspective on the issues facing developing cities especially sustainable transportation

and equal access to public space As mayor of Bogotá Peñalosa initiated development of the TransMilenio Rapid Bus Transit system among the largest and most comprehensive public transit systems in the Global South which carries 2.5 million passengers a day along dedicated bus lanes bike paths and a rapid metro line The system emphasizes accessibility for the entire population Peñalosa's efforts to create public space were similarly ambitious over the course of his two terms more than a thousand public parks were created or improved Underlying these policies was a conviction of how cities should be a compelling humanistic philosophy of sustainable urbanism For Peñalosa city design is not just engineering it defines human happiness dignity and equality An advanced city is not one where the poor own a car Peñalosa writes but one where the rich use public transport Equality and the City provides practical criteria for conceiving and constructing different and better cities describes the obstacles that are confronted when doing so and identifies ways to overcome them
