**Designing Microlearning** Carla Torgerson, Sue Iannone, 2019-12-31 Learn to Create Effective Microlearning. Microlearning is an essential tool that talent development professionals can use to fully engage their learners and tackle organizational performance needs. How do you know if the microlearning approach is successful? And what works? In *Designing Microlearning*, the newest volume in ATD's What Works in Talent Development series, experts Carla Torgerson and Sue Iannone answer these and other questions including: Why choose microlearning for your learners and organization? How do you determine your approach and then execute the implementation? How do you demonstrate success? Where do you go once you've started? This guide for practitioners covers the four main uses for microlearning: preparation before a learning event, follow-up to support a learning event, stand-alone training, and performance support. It introduces MILE, the MicroLEarning Design model, which outlines the details of creating a microlearning resource or program. Discover how to identify performance objectives, determine program technology and structure, create or select resources, promote what you designed, and monitor, modify, and evaluate it. Included are case studies, tips, and resources, as well as more than 20 job aids, checklists, and worksheets. Samples consist of an assessment of your organization's readiness and compatibility for microlearning, a worksheet to guide the design of your microlearning, a tool for aligning your microlearning measurement and evaluation efforts, a communication plan for sharing key information with learners, managers, and stakeholders. *The Complete Works...* Andrew Fuller, 1859. *Sociology in India* Mr. Rohit Manglik, 2024-03-14.
