Meeting the Challenges of Existential Threats through Educational Innovation Herner Saeverot,2021-11-22

Meeting the Challenges of Existential Threats through Educational Innovation is the first book of its kind to provide an educational and systematic analysis of problems and solutions regarding the most pressing threats that humankind is facing. The book makes a case for the importance of education responding to significant threats including climate change, pandemics, decline in global biodiversity, overpopulation, egoism, ideologies, nuclear biological and chemical warfare, inequality, artificial intelligence, and ignorance, and the distortion of truth. Written by leading experts in their field based on cutting edge research, the chapters explore these issues and offer suggestions for how education can address these problems in the future. This groundbreaking and highly topical book will be an essential reading for academics, researchers, and post graduate students in the fields of education, research, environmental studies, educational politics, and organizational management. **Willing's**

Press Guide and Advertisers' Directory and Handbook, 2002 **What the Tech?** Rachelle Dene Poth, 2025 With artificial intelligence, AI, augmented reality, AR, virtual reality, VR, blockchain, non fungible tokens, NFTs, the metaverse, and Web3 being used in the world of work and education, students need opportunities to learn about, explore, and create with emerging technologies. At the same time, educators need the right resources to stay current with the changes and be able to provide the guidance students need to develop the skills that are essential today and are likely to be in demand for the jobs of the future. Based on a course developed by the author, this book explores how to create impactful learning experiences so that students can apply their knowledge to real world problems, collaborate with peers from around the world, and develop critical thinking skills while expanding their understanding of the world and their place in it. *Considerations on Cyber Behavior and Mass Technology in Modern Society* Beneventi, Paolo, 2024-01-30 In our fast paced technology driven world, there is a strong sense of untapped potential and unfulfilled promises. People today possess an unprecedented amount of power through their technological gadgets but often remain unaware of how to wield it effectively. This lack of understanding and agency leads to a plethora of societal problems, from passive consumerism to environmental degradation, fostering a sense of helplessness. *Considerations of Cyber Behavior and Mass Technology in Modern Society* offer a comprehensive solution to this pressing issue. It is a scholarly beacon guiding academic scholars and critical thinkers toward a profound reassessment of our relationship with technology and society. By delving into the intricate web of topics such as active citizenship, global information production, and the coexistence of consumer technology and freedom, our book presents an opportunity to explore the root causes of our modern day challenges. **Willing's Press Guide**, 2004 Coverage of publications outside the UK and in non English languages expands steadily until in 1991 it occupies enough of the Guide to require publication in parts.
