Productivity in Europe Florian Misch,Ben Park,Carlo Pizzinelli,Galen Sher,2025-04-04 The discussion on Artificial Intelligence AI often centers around its impact on productivity but macroeconomic evidence for Europe remains scarce Using the Acemoglu 2024 approach we simulate the medium term impact of AI adoption on total factor productivity for 31 European countries We compile many scenarios by pooling evidence on which tasks will be automatable in the near term using reduced form regressions to predict AI adoption across Europe and considering relevant regulation that restricts AI use heterogeneously across tasks occupations and sectors We find that the medium term productivity gains for Europe as a whole are likely to be modest at around 1 percent cumulatively over five years While economically still moderate these gains are still larger than estimates by Acemoglu 2024 for the US They vary widely across scenarios and countries and are substantially larger in countries with higher incomes Furthermore we show that national and EU regulations around occupation level requirements AI safety and data privacy combined could reduce Europe s productivity gains by over 30

percent if AI exposure were 50 percent lower in tasks occupations and sectors affected by regulation Small Business Sourcebook ,2010 A guide to the information services and sources provided to 100 types of small business by associations consultants educational programs franchisers government agencies reference works statisticians suppliers trade shows and venture capital firms **Investment Weekly** ,1918 **AI Magazine** ,2003 **VLSI Design** ,1985 The Weekly Underwriter Alasco Delancey Brigham, Henry Rogers Hayden, 1929 American Bee Journal ,1897 Includes summarized reports of many bee keeper associations **The Automobile** ,1909 **The Chamber of Commerce Journal** ,1916 **Better Fruit ...
