Library of Congress. Copyright Office, 1977 **Program Evaluation** Susan P. Giancola, 2025-04-14 This text aims to build evaluation capacity by increasing knowledge about evaluation and improving skills to conduct evaluations The book s embedded approach uses program theory to understand relationships between activities and objectives logic modeling to

represent the program's theory and an evaluation matrix to structure the evaluation within the program. The approach is systematic and focused on continuous improvement. The Second Edition adds topics suggested by users of the book, incorporates content that the author has added to her own classes and covers emerging areas in evaluation since the publication of the first edition such as artificial intelligence and equity in evaluation. A companion website at <http://edge.sagepub.com> Giancola2e includes a number of instructor resources including editable PowerPoint slides and assignments.

The Routledge Handbook of Translation Technology and Society Stefan Baumgarten, Michael Tieber, 2025-10-08. The Routledge Handbook of Translation Technology and Society offers the first comprehensive and critical exploration of translation technologies in the context of globalised multilingual societies within an increasingly AI-dominated world. This handbook calls for a fundamental rethinking of traditional approaches to translation, examining the ethical, ideological, socioeconomic and environmental implications of digital tools and practices such as professional AI-driven translation, everyday machine translation, crowdsourcing translation or platform-based translation work. It provides deep insights into pressing issues such as the commodification of language, inclusivity in so-called low resource languages, data colonialism and labour exploitation. By questioning conventional science narratives and advocating for sustainable, inclusive and equitable applications of translation technologies, this handbook empowers readers to engage critically with current trends and challenges in the digital age. Readers will benefit from an interdisciplinary approach that combines novel theoretical foundations with empirical research and practical case studies. It serves as a foundational reference and a springboard for critical future research in an evolving sociotechnical translation ecosystem where the blurring boundaries between human and machine agents foster new modes of translator-machine interaction. This handbook is an essential resource for academics, researchers and professionals in translation studies, digital humanities, science and technology studies or digital discourse studies. Chapter 15 and introduction of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-NonCommercial-NoDerivatives (CC BY-NC-ND) 4.0 International license.
