Technology-Mediated Learning Environments for Young English Learners L. Leann Parker, 2023-05-31. This book explores issues related to the use of technologies to support young second language learners and looks at promising areas for research design and development. Grounded in a sociocultural theoretical framework, it invites educators, researchers, and educational technology developers to consider a range of social and cultural factors in utilizing technology as a tool to help children from diverse linguistic and cultural backgrounds develop their English language and reading skills. A major contribution is the authors' consideration of ways that technology outside of school can benefit these students. English language development in school. The central chapters are counterpointed by invited reflections that bring to the discussion different yet complementary perspectives from notable scholars in the field of second language literacy and learning. Technology-Mediated Learning Environments for Young English Language Learners is targeted to researchers, educators, and policymakers in the areas of elementary education, after-school learning, second language teaching and learning, English language and literacy development, and reading.
