Mind-Reading and Artificial Intelligence: Past, Present and Future Prof. (Dr.) Jai Paul Dudeja, 2024-10-30 Mind reading typically refers to the ability of discerning or interpreting someone else's thoughts, feelings, or intentions. Mind Reading has two components: human-based and ii device-based artificial intelligence. Artificial Intelligence (AI) refers to programming computers to do tasks that normally require human intelligence, like learning, problem-solving, and understanding language. It is like giving computers the ability to think and make decisions on their own, similar to how humans do. AI helps machines learn from data, adapt to new situations, and perform tasks without being explicitly programmed for each step. This book covers the topics on human-based and device-based mind reading and interpretation of artificial intelligence, which is divided into 32 chapters and the following 8 sections: i Mind Reading and Artificial Intelligence Introduction and Overview ii Human Based Mind Reading iii Artificial Intelligence Introduction Types of Learning iv Device Based Mind Reading And Virtual Assistants v Applications and Opportunities of Artificial Intelligence vi Artificial Intelligence Ethical Issues Risks and Regulations vii Artificial Consciousness and viii Artificial Intelligence in India Status and the Way Forward

Reading an Unknown Organization Peter Wollmann, Lukas Stricker, Doris Pömler, 2024-10-22 This book focuses on Organizational Intelligence and its connection to the Three Pillar Model, a framework developed by a global community of over 60 professionals from various sectors and published by Springer Nature. The model centers on three vital pillars for navigating the volatile, uncertain, complex, and ambiguous (VUCA) world of organizational design and leadership: Sustainable Purpose, Travelling Organization, and Connectivity. At its core, the book features interviews with executive leaders, including those in the C-Suite who have recently assumed new roles in new organizations or have done so in their careers. The interviews are diverse and anonymized to encourage candid responses. The book explores how these leaders quickly gain a comprehensive understanding of their organizations, with a focus on coping with change, transformation, sustainability, and UN SDG coverage. Offering real case study-based guidance, the book does not seek to provide a one-size-fits-all methodology but instead encourages readers to tailor its insights to their unique circumstances. It is a valuable resource for mentoring and coaching purposes.
