It offers simple, clear strategies to make your lessons more engaging, reduce your workload, and give students more personalized learning without replacing the human touch that makes teaching meaningful. You'll learn how to use AI tools to support students outside class, automate tasks like grading and feedback, and create lessons that match each student's level. From writing help to speaking practice, lesson planning to gamified learning, this book shows how AI can make your job easier and your classroom more exciting. Social Machines James Hendler, Alice M. Mulvehill, 2016-09-20 Will your next doctor be a human being or a machine? Will you have a choice? If you do, what should you know before making it? This book introduces the reader to the pitfalls and promises of artificial intelligence (AI) in its modern incarnation and the growing trend of systems to reach off the Web into the real world. The convergence of AI, social networking, and modern computing is creating an historic inflection point in the partnership between human beings and machines, with potentially profound impacts on the future, not only of computing but of our world and species. AI experts and researchers James Hendler, co-originator of the Semantic Web, Web 3.0, and Alice Mulvehill, developer of AI-based operational systems for DARPA, the Air Force, and NASA, explore the social implications of AI systems in the context of a close examination of the technologies that make them possible. The authors critically evaluate the utopian claims and dystopian counterclaims of AI prognosticators. *Social Machines: The Coming Collision of Artificial Intelligence, Social Networking, and Humanity* is your richly illustrated field guide to the future of your machine-mediated relationships with other human beings and with increasingly intelligent machines. What Readers Will Learn: What the concept of a social machine is and how the activities of non-programmers are contributing to machine intelligence; How modern artificial intelligence technologies such as Watson are evolving and how they process knowledge from both carefully produced information such as Wikipedia and journal articles and from big data collections; The fundamentals of neuromorphic computing, knowledge graph search, and linked data, as well as the basic technology concepts that underlie networking applications such as Facebook and Twitter; How the change in attitudes towards cooperative work on the Web, especially in the younger demographic, is critical to the future of Web applications. Who This Book Is For: General readers and technically engaged developers, entrepreneurs, and technologists interested in the threats and promises of the accelerating convergence of artificial intelligence with social networks and mobile web technologies. *Productive, Not Polarizing* Heather Kenyon Casey, This book, co-published with the National Science Teaching Association (NSTA), provides the support that K-12 teachers and students need for more complex science investigations. Drawing on research that informs effective literacy practices, this

book pushes back on singular ideologies programs and divisive rhetoric and instead embraces an inclusive perspective for supporting literacy development and learning Readers are encouraged to move beyond debates that divide us and look toward the hard but necessary work of building the partnerships needed to support all students Productive Not Polarizing begins with a focus on community literacies and then describes effective literacy practices across grade levels Designed for a wide audience it will assist educators families and community partners to have informed conversations about what literacy instruction and learning involves Every chapter includes a Community Snapshot describing a real life scenario in which a partnering benefits students an Ideas for Action section that can be adapted to your own context reflection questions and a list of helpful resources that include potential sources of funding Book Features An accessible positive discussion of literacy research and practices for educators families and community partners A response to increasingly contentious conversations about literacy instruction Guidance to help educators engage with key community partners and stakeholders such as administrators families childcare centers afterschool programs and local school boards Opportunities to consider the role of teacher education and professional development in supporting school community conversations Ready to use resources such as reproducible materials and community planning and event guides
