Technology and Adolescent Mental Health Megan A. Moreno, Ana Radovic, 2018-03-01 This comprehensive book provides a framework for healthcare providers working with the dual challenges and opportunities presented by the intersection of mental health and technology. Technology and Adolescent Mental Health provides recent evidence based approaches that are applicable to clinical practice and adolescent care with each chapter including a patient case illustrating key components of the chapter contents. Early chapters address the epidemiology of mental health while the second section of the book deals with how both offline and online worlds affect mental health presenting both positive and negative outcomes and focusing on special populations of at risk adolescents. The third section of the book focuses on technology uses for observation diagnosis or screening for mental health conditions. The final section highlights promising future approaches to technology and tools for improving intervention and treatment for mental health concerns and illnesses. This book will be a key resource for pediatricians, family physicians, internal medicine providers, adolescent medicine and psychiatry specialists, psychologists, social workers as well as any other healthcare providers working with adolescents and mental health care. Machine Learning for Kids Dale Lane, 2021-02-09 A hands on application based introduction to machine learning and artificial intelligence. AI Create compelling AI powered games and applications using the Scratch programming language. AI Made Easy with 13 Projects. Machine learning also known as ML is one of the building blocks of AI or artificial intelligence. AI is based on the idea that computers can learn on their own with your help. Machine Learning for Kids will introduce you to machine learning painlessly. With this book and its free Scratch based companion website you will see how easy it is to add machine learning to your own projects. You don't even need to know how to code. Step by easy step you will discover how machine learning systems can be taught to recognize text, images, numbers and sounds and how to train your models to improve them. You will turn your models into 13 fun computer games and apps including A Rock Paper Scissors game that recognizes your hand shapes, A computer character that reacts to insults and compliments, An interactive virtual assistant like Siri or Alexa, A movie recommendation app, An AI version of Pac Man. There's no experience required and step by step instructions make sure that anyone can follow along. No Experience Necessary.
