What is an open AI?

An open AI is an artificial intelligence (AI) system that is powered by freely-available software and open source technology. An open AI system enables **developers** to build, deploy and maintain machine learning applications in an environment accessible to everyone.

Open AI systems are also designed to collaborate and **share data** with other machines across the globe, thus allowing for collective intelligence and decision-making.

Open AI systems are designed to be transparent and accountable, enabling developers to make changes that benefit their communities in a safe and secure manner. Open AI encompasses **both software and hardware**, allowing for the development of customized applications that can meet specific user needs.

Additionally, open AI allows for increased **scalability of machine learning models**, so that developers can more easily accommodate larger datasets and use more powerful computing resources.
