Demystifying Academic Writing in Higher Education: A Process View on Academic Textual Production Xinghua Liu, Rui Alexandre Alves, Angelique Aitken, Josef Schmied, 2025-10-30 Academic writing in this Research Topic refers to the type of writing demonstrating students disciplinary knowledge of and proficiency in synthesizing analyzing and responding critically to new information Hyland 2004 Swales 1990 which may include those genres like course essays project reports research proposals lab notes journal articles conference paper theses and dissertations As the current workplaces have become increasingly specialized higher education worldwide has been increasingly charged with the task of developing students academic writing and correspondingly on students parts learning through writing has been necessary for them to succeed in higher education To prepare university students for writing challenges during the past decades numerous studies have been devoted to the study of linguistic and rhetorical resources in students academic writing under such umbrella terms like style reader awareness authorial voice writers identity stance evaluation textual structures steps and moves Charles Hunston Hinkel 2002 However previous

research on academic writing has been predominantly focused on the linguistic and rhetorical aspects namely the final product of students writing while the nature and processes of composition students engagement and individual differences and the influence of contextual factors like emerging technology have been under explored Thus the goal of this Research Topic is to bring a process oriented and dynamic perspective to the study of textual production in academic contexts by both encouraging an expanded view of existing research paradigms and also welcoming novel approaches Data can be collected by using corpus building interviews and questionnaires but we would also welcome the use of experimental methods and a mixed method approach for data collection Meanwhile previous research mainly studied university students who were learning English as a second or foreign language hence we also welcome research examining first language writers and students who are learning a second or foreign language other than English We believe for the study of the complex phenomenon like academic writing no single method or tool can suffice Therefore we strongly recommend a more creative perspective in data collection and analyzing and interpreting academic writing Papers can present quantitative data analyses based on experimental design or qualitative data analyses stemmed from more ethnographic oriented research Systematic review studies are also welcome We encourage contributions related but not restricted to the following topics

- 1 Cognitive processes in academic texts planning composing and revisions and student writers individual differences
- 2 Metacognition and self regulation in academic texts planning composing and revisions and student writers individual differences
- 3 Motivation and self efficacy in academic texts planning composing and revisions and student writers individual differences
- 4 Linguistic and rhetorical choices identity construction and disciplinary knowledge construction
- 5 Student writers textual production peer feedback and interactions with discourse communities
- 6 Affordances and challenges of artificial intelligence AI in the process of academic textual production in higher education

Continuing Engineering Education for a Sustainable Future Patricia Caratozzolo, Angeles Dominguez, Bente Nørgaard, Guillermo M. Chans, 2025-08-06 The World Economic Forum stated in its 2023 Future of Jobs report that 44% of workers skills will change in the next five years Additionally six out of ten workers will require training before 2027 and only half will have adequate training opportunities With this in mind the three most pressing challenges currently facing the Continuing Engineering Education CEE community include

- 1 The shifting skill requirements dictated by the job market Engineering roles in various sectors are evolving demanding a mix of Knowledge Skills and Abilities KSA that is difficult to predict with certainty In addition the pace of Digital Transformation will highly influence these requirements
- 2 The climate change mitigation and adaptation Engineers must reskill and adapt to changing sustainability requirements and educational programs must support this transition
- 3 The underrepresentation of minorities Women racial and ethnic minorities and individuals with disabilities face disparities in opportunities mentorship and inclusion
