Immersive Learning in Teacher Education: Simulated Environments, Tools, and Practices Goff, Wendy May, 2025-06-17

As the demand for educators continues to grow teacher preparation programs must evolve to equip future teachers with the skills and confidence needed for today's dynamic classrooms. Using innovative technologies such as virtual simulations, augmented reality, and AI platforms has transformed teacher education. These immersive tools provide safe, controlled spaces where aspiring educators can practice, reflect, and refine their instructional strategies in real time. By bridging theory and practice, immersive learning empowers teacher candidates to develop critical competencies and adapt more effectively to the realities of diverse educational settings. Immersive Learning in Teacher Education: Simulated Environments, Tools, and Practices explores the use of immersive technology in higher education. The book uses examples from accredited governments and education departments from around the world and serves as a source of possibility and inspiration for academics and faculties across the higher education landscape, as well as for classroom teachers working in schools and other educational settings. Covering topics such as AI gamification and virtual reality, this book is an excellent resource for teachers, higher education faculty, and policymakers, academicians, researchers, and more. **Teacher Learning in**

**Changing Contexts** Alison Castro Superfine, Susan R. Goldman, Mon-Lin Monica Ko, 2022-09-13. New to the Routledge Advances in Learning Sciences series, this book highlights diverse approaches taken by researchers in the Learning Sciences to support teacher learning. It features international perspectives from world-class researchers that exemplify new lenses on the work of teaching, encompassing new objects of learning, methods, and tools; new ways of working with researchers and peers; and new efforts to work with the systems in which teachers are embedded. Together, the chapters in this volume reflect a new frontier of research on teacher learning that leverages diversity in the content, contexts, objects of inquiry, and tools for supporting shifts in instructional practice. Divided into three sections, chapters question: What new pedagogies and knowledge do teachers need to facilitate student learning in the 21st century? How do learning sciences tools, strategies, and experiences provide opportunities for them to learn these? What role do teachers play as co-designers of educational innovations? What unique affordances does co-design afford for teacher learning? What do teachers learn through engaging in co-design? How do teachers work and learn as part of interdisciplinary teams within educational systems? What might it look like to design for teacher learning in these broader organizational systems? Uniquely highlighting how cycles of reflection and co-design can serve as important mechanisms to support teacher learning, this invaluable book lays the groundwork for sustained teacher learning and instructional improvement. Cases on Enhancing P-16 Student Engagement With Digital Technologies

Gierhart, Aaron R., 2024-12-27. Reimagining how digital technologies are integrated into education is crucial for fostering active and meaningful student engagement. Traditional knowledge-centric approaches often overlook the dynamic processes students use to interact with and apply technology in their learning. By focusing on how students actively engage with digital

tools to meet academic and developmental goals educators can create richer more effective learning experiences This shift not only enhances academic outcomes but also prepares students with the critical skills needed to navigate and contribute to an increasingly digital world Cases on Enhancing P 16 Student Engagement With Digital Technologies features cases of teaching and learning with digital technologies in P 16 educational settings focusing specifically on what learners do with technology It shares cases of teaching in which technologies are leveraged in student centered ways that transform learning and allow students to engage in authentic meaningful learning experiences Covering topics such as artificial intelligence AI immersive learning experiences and traditional learning this book is an excellent resource for P 16 educators leaders stakeholders policymakers and more
