C.G. Jung Elie G. Humbert, 1988 *Jungian and Psychoanalytic Perspectives on Christmas* Kendrick Lyddon Norris, 2025-09-08 By examining its history traditions symbols and representation in the arts through the lens of three major schools of depth psychology Kendrick L Norris a Jungian Analyst and minister shows how better understanding of the promise of Christmas can allow us to discover what it is that we long for the most Why does the winter celebration of Christmas have such a deep rooted resonance individually and collectively This extensively researched book clearly and engagingly articulates the soul reasons why this holiday has such a significant impact on the human psyche The work begins with an explanation about how depth psychology can be used to understand the Christmas phenomenon followed by an investigation into the origins and symbols of Christmas The book closes by delving into the soul meaning of Christmas through the perspectives of Freud Kohut and Jung This thought provoking volume will appeal to Jungian Analysts psychoanalysts and psychotherapists as well as those interested in religion and its relation to depth psychology *Fractals of Brain, Fractals of Mind* Earl R. Mac Cormac, Maksim Stamenov, 1996 This collective volume is the first to discuss systematically what are the possibilities to model different aspects of brain and mind functioning with the formal means of fractal geometry and deterministic chaos At stake here is not an approximation to the way of actual performance but the possibility of brain and mind to implement nonlinear dynamic patterns in their functioning The contributions discuss the following topics among others the edge of chaos dynamics in recursively organized neural systems and in intersensory interaction the fractal timing of the neural functioning on different scales of brain networking aspects of fractal neurodynamics and quantum chaos in novel biophysics the fractal maximum power evolution of brain and mind the chaotic dynamics in the development of consciousness etc It is suggested that the margins of our capacity for phenomenal experience are fractal limit phenomena Here the possibilities to prove the plausibility of fractal modeling with appropriate experimentation and rational reconstruction are also discussed A conjecture is made that the brain vs mind differentiation becomes possible most probably only with the imposition of appropriate symmetry groups implementing a flowing interface of features of local vs global brain dynamics Series B **Cross-currents of Jungian Thought** Donald R. Dyer, 1991
