Enabling Flexibility in Process-Aware Information Systems Manfred Reichert, Barbara Weber, 2012-08-28 In today's dynamic business world the success of a company increasingly depends on its ability to react to changes in its environment in a quick and flexible way. Companies have therefore identified process agility as a competitive advantage to address business trends like increasing product and service variability or faster time to market and to ensure business IT alignment. Along this trend a new generation of information systems has emerged so called process aware information systems PAIS like workflow management systems, case handling tools and service orchestration engines. With this book Reichert and Weber address these flexibility needs and provide an overview of PAIS with a strong focus on methods and technologies fostering flexibility for all phases of the process lifecycle i.e. modeling, configuration, execution and evolution. Their presentation is divided into six parts. Part I starts with an introduction of fundamental PAIS concepts and establishes the context of process flexibility in the light of practical scenarios. Part II focuses on flexibility support for pre specified processes the currently predominant paradigm in the field of business process management BPM. Part III details flexibility support for loosely specified processes which only partially specify the process model at build time while decisions regarding the exact specification of certain model parts are deferred to the run time. Part IV deals with user and data driven processes which aim at a tight integration of processes and data and hence enable an increased flexibility compared to traditional PAIS. Part V introduces existing technologies and systems for the realization of a flexible PAIS. Finally Part VI summarizes the main ideas of this book and gives an outlook on advanced flexibility issues. The book's target groups include researchers, PhD students and Master students in the field of information systems. After reading the book they will better understand PAIS flexibility aspects. To support the easy use as a textbook a series of exercises is provided at the end of each chapter and slides and further teaching material are available on the book's web site www.flexibleprocesses.com. Professionals specializing in business process management BPM who want to obtain a good understanding of flexibility challenges in BPM and state of the art solutions will also benefit from the presentations of open source as well as commercial process management systems and related practical scenarios.
