C Programming for Engineering and Computer Science H. H. Tan, T. B. D'Orazio, 1999 **Books In Print**
2004-2005 Ed Bowker Staff, Staff Bowker, Ed, 2004 *American Book Publishing Record*, 2003 **Cumulated Index to the Books**, 1999 Computerworld, 1994-11-21 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld's award winning Web site Computerworld.com twice monthly publication focused conference series and custom research form the hub of the world's largest global IT media network **Novel Techniques in Recovering, Embedding, and Enforcing Policies for Control-Flow Integrity** Yan Lin, 2021-04-30 There are three fundamental components in Control Flow Integrity CFI enforcement The first component is accurately recovering the policy CFG Usually the more precise the policy is the more security CFI improves but precise CFG generation was considered hard without the support of source code The second component is embedding the CFI policy securely Current CFI enforcement usually inserts checks before indirect branches to consult a read only table which stores the valid CFG information However this kind of read only table can be overwritten by some kinds of attacks e.g the Rowhammer attack and data oriented programming The third component is to efficiently enforce the CFI policy In current approaches CFI checks are always executed whenever there is an indirect control flow transfer Therefore it is critical to minimize the performance impact of CFI checks In this book we propose novel solutions to handle these three fundamental components To generate a precise CFI policy without the support of the source code we systematically study two methods which recover CFI policy based on function signature matching at the binary level and propose our novel rule and heuristic based mechanism to more accurately recover function signature To embed CFI policy securely we design a novel platform which encodes the policy into the machine instructions directly without relying on consulting any read only data structure by making use of the idea of instruction set randomization Each basic block is encrypted with a key derived from the CFG To efficiently enforce CFI policy we make use of a mature dynamic code optimization platform called DynamoRIO to enforce the policy so that we are only required to do the CFI check when needed *The Cumulative Book Index*, 1999 The British National Bibliography Arthur James Wells, 2000 **10th European Conference on Games Based Learning**, *Subject Guide to Books in Print*, 2001 **Whitaker's Books in Print**, 1998 Student-staff Directory University of Minnesota, 2007 *Commencement [program]* Princeton University, 2009 ECGBL2015-9th European Conference on Games Based Learning Robin Munkvold and Line Kolås, 2015-09-18 These proceedings represent the work of researchers participating in the 9th European Conference on Games Based Learning which is being hosted this year by Nord Trondelag University College Steinkjer Norway on the 8-9 October 2015 The Conference has become a key platform for individuals to present their research findings display their work in progress and discuss conceptual advances in many different areas and specialties within Games Based Learning It also offers the opportunity for like minded individuals to meet discuss and share
