Ferguson, 1998 This is the first look at the particular strengths and weaknesses of broadcast television written during the new age of television an era that includes cable home video and digital satellite systems as competing distribution systems The Broadcast Television Industry is a current comprehensive review of the dominant distributor of television programming in the United States The book reviews the history and current practices of both commercial and public television Separate chapters explore the regulation of television the operation of local stations and national networks audience research the impact of our most pervasive medium and the future of broadcasting as a means of television distribution in an increasingly competitive environment Broadcast and cable television managers and employees Part of the Allyn Bacon Series in Mass Communication **Blue Skies** Patrick Parsons, 2008-04-05 Cable television is arguably the dominant mass media technology in the U S today Blue Skies traces its history in detail depicting the important events and people that shaped its development from the precursors of cable TV in the 1920s and 30s to the first community antenna systems in the 1950s and from the creation of the national satellite distributed cable networks in the 1970s to the current incarnation of info structure that dominates our lives Author Patrick Parsons also considers the ways that economics public perception public policy entrepreneurial personalities the social construction of the possibilities of cable and simple chance all influenced the development of cable TV Since the 1960s one of the pervasive visions of cable has been of a ubiquitous flexible interactive communications system capable of providing news information entertainment diverse local programming and even social services That set of utopian hopes became known as

the Blue Sky vision of cable television from which the book takes its title Thoroughly documented and carefully researched yet lively occasionally humorous and consistently insightful Blue Skies is the genealogy of our media society **Broadcast Television** Walter McDowell,2006 From unraveling the confusion surrounding digital TV to revealing the inner workings of Nielsen ratings Broadcast Television A Complete Guide to the Industry takes an impartial and in depth look at the business of commercial television Unlike many books addressing this topic the purpose of this primer is not to support a partisan opinion about what is right or wrong with television but rather to provide objective information from which the reader can make his or her own judgments To that end the organization and presentation style is also unique in that the industry is explained as a dynamic and interdependent system of technology economics and regulation This systems approach to learning helps the reader understand better the interwoven parts of television business As a concise and highly focused overview of the business of commercial television Broadcast Television A Complete Guide to the Industry can serve as a stand alone text or as a supplement to other course readings addressing an array of topics involving television today Telecommunications Directory, 1998 Gale Group,1997-09 This reference provides descriptions and contact addresses for over 2500 national and international communications systems and services The range of systems and services covered includes voice and data communication services local area networks teleconferencing facilities videotext and e mail Veronis Suhler Stevenson Communications Industry Forecast Veronis Suhler Stevenson,2005 Customer Service and Billing Practices in the Cable and Satellite Television Industry United States.
