congressional hearings and funding cuts Highlighting the people who made possible some of public health s biggest successes Foege outlines the work required behind the scenes and describes the occasional tensions between professionals in the field and the politicians in charge of oversight In recent years global public health initiatives have come from unanticipated sources Giants in the field now include President Jimmy Carter and his wife Rosalynn who promote programs aimed at neglected diseases Melinda and Bill Gates have invigorated the field through research and direct program support especially in the area of vaccine preventable diseases And the Merck Mectizan program has dramatically reduced river blindness in Africa Foege has been involved in all of these efforts among others and he brings to this book the knowledge and wisdom derived from a long and accomplished career The Fears of the Rich The Needs of the Poor is an inviting but unvarnished account of that career and offers a plethora of lessons for those interested in public health
