**Triumph of Love Illustrated - Part II** Pravir Malik,2025-07-14 Part II From Quantum Seeds to the Second Singularity After EM WAMP the same iterative generator equation yields successive P type beings quantum particles atoms molecules cells and ultimately the human P type Each step adds complexity by combining information from faster than light layers with the finite physical layer At the human stage faculties such as urge will emotion and thought open quantum windows into FBLEE the Four Base Logic Encoding Ecosystem that stores pre genetic instructions Constructive mutations which integrate additional super luminal information update FBLEE and DNA alike destructive mutations which align with the zero speed 0 type layer remain local and do not alter foundational logic Continued constructive integration leads to super matter based P type beings and large scale entities stable mega organizations and a sustainable global civilization whose codes currently exist only in FBLEE Their eventual materialization accelerates universal expansion a candidate explanation for dark energy and prepares the way for the Second Singularity or S type being where fourfold functionality becomes fully conscious and horizontally as well as vertically integrated In contrast derivative D type beings technologies built on fragmented finite information sets can extend capability but cannot match the coherence or longevity of S type evolution The book s second half maps these possibilities outlining how persistent quantum level computation may steer humanity and the cosmos toward or away from that ultimate integrative state

**Triumph of Love** PRAVIR MALIK,2020-04-04 Broadly speaking transhumanism refers to a philosophy whose focus is to move beyond current human limits This book suggests an approach to transhumanism based on a perception of Light elaborated in the previous nine books in the Cosmology of Light book series In this perception light is envisioned as existing at different constant speeds We know that in our physical universe light travels at a constant speed referred to as c of 186 000 miles per second This has a concrete bearing on how we experience time and space and on how

matter arises and in a Cosmology of Light it can be said that light at  $c$  is an intentionality to filter infinite potentiality from Light's native state of traveling infinitely fast so life can arise in a particular way. So imagine light traveling infinitely fast. This would suggest another reality packed with infinite possibility due to Light's omnipresence, omnipotence, omniscience, and omninurturing fourfoldness. Omnipresence because Light would be instantaneously present in whatever volume considered. Omnipotence because anything not of the nature of light will be overcome by it. Omniscience because light being everywhere will know what arises or disappears in it. Omninurturing because all would exist in one nature and be bound by it. As the previous books have elaborated and as this book will adequately summarize, a cosmology arises when we consider the simultaneous and interpenetrating realities created when Light exists at multiple constant speeds simultaneously. The dynamics and information resident in each of these simultaneous realities is arbitrated into material reality through a constant and persistent quantum level computation that generates genetic type information that effectively becomes law. Quanta in such a cosmology is perceived as being the mechanism by which information in faster moving layers of light is materialized in a slower moving layer of light. Law manifests as quadrumvirate mechanisms such as space time energy gravity, the electro magnetic wave archetype, mass potential spectrum, quark lepton boson Higgs boson particles, s shell p shell d shell f shell atoms, nucleic acid lipid protein polysaccharide cells, amongst other mechanisms that derive their ability to become based on the native being of Light's omnipresent, omnipotent, omniscient, omninurturing fourfoldness. It may even be said that such becomings resulting in quadrumvirate based law reveal essential beings. Hence a being or a particular kind of taxonomic classification akin to the species genus family order class phylum kingdom domain as in the hierarchy of life is revealed with successful becoming. Plate 1 that follows shortly summarizes such a classification by way of a contemplative map of being. Hence Light in its native state traveling with infinite speed may be thought of as sitting at the top of such a taxonomic hierarchy generating light based domains, kingdoms, phyla, classes, and so on. But such fourfoldness that manifests as effective law or through the becoming involving persistent quantum level computation that reveals a being is none other than a triumph of love. For it is only the power of love of that innate need to maintain the integrality of light's fourfoldness even as it continues to materialize that can be the foundation of a sustainable becoming. The more powerful such love so that in any materialization there is integration not only of the fourfoldness of Light's implicit properties but also of an integration of the many layers of light existing at different speeds, the more fully will a becoming be founded on completeness of potentiality in light to itself become a being capable of engendering light based life. Hence as will be suggested in this book not only does a particular type of being engender vast variation within that type but further beings can combine with beings which is essentially an act of love to create more comprehensive beings resulting in all the complexity of life. Life itself will be seen to originate in the native state of Light adding function and variation as light precipitates into more and more material reality emerging as a fullness of life. At the base of all possible variation and advancement in being becoming and life is the

ability to influence the process of the persistent quantum level computation so that there is a more complete horizontal and vertical integration of Light a more complete light based singularity as it were and therefore of the output of genetic type information and consequently of laws that are active in a being s becoming This is what is considered to be the basis of a system or framework of transhumanism in a cosmology of light
