Beckett and Nature Charles Clements,Eleanor Green,James

Martell,2025-07-10 New analyses on the insightful ways in which Beckett's work actively engages with contested notions of Nature and the natural developing a radical version of modernism's main questions and insights Beckett and Nature takes its cue from contemporary developments in Beckett scholarship focused on ecocriticism posthumanism and the Anthropocene going beyond them into a questioning of the very concepts of Nature and the natural It examines one of the most unthought ontological dimensions of literature and life that symbolic space deemed natural or part of Nature appears necessary and undeniable and therefore impossible to be deconstructed In doing so the authors show that in fact this space takes on many shapes recognizing three natural dimensions criticized by Beckett bodies worlds and literatures Featuring a wide range of both Beckett's work and Beckett scholars including Jean Michel Rabat and Stanley E Gontarski Beckett and Nature offers contextualized readings of the understandings of nature and the natural throughout his decade spanning oeuvre The volume shows that part of the radicality of Beckett's writing is that through a variety of evolving techniques and strategies it questions what appears in our cultures as the most unquestionable and opens up possibilities for thinking not only what is human literature and philosophy but also gender identity and any attempt at definitions of ourselves or the world at large

Theories of Human Nature - Third Edition

Peter Loftson,2006-01-06 This book explores the idea of human nature and the many understandings of it put forward by such diverse figures as Aristotle Rousseau Marx Freud Darwin and E O Wilson Each chapter looks at a different theory and offers a concise explanation assessing the theory's plausibility without forcing it into a mould Some chapters deal with the ideas of only one thinker while others such as the chapters on liberalism and feminism present a variety of different positions A clear distinction is made between theories of human nature and the political theories which so often follow from them For the new edition Loftson has addressed the new developments in the rapidly expanding genetic and paleontological record as well as expanded the discussion of the Christian theory of human nature by incorporating the ideas of the Marx scholar and social theorist G A Cohen The new edition has also been substantively revised and updated throughout

Mountain Dialogues Frank Waters,1999 A compelling study of the origins and trajectory of one of the legendary black uprisings against apartheid Theatres of Struggle and the End of Apartheid draws on insights gained from the literature on collective action and social movements It delves into the Alexandra Rebellion of 1986 to reveal its inner workings Belinda Bozzoli's aim is to examine how the residents of Alexandra a poverty stricken segregated township in Johannesburg manipulated and overturned the meanings of space time and power in their

sequestered world She explains how they used political theater to convey stage and dramatize their struggle and how young and old residents generated differing ideologies and tactics giving rise to a distinct form of generational politics Theatres of Struggle and the End of Apartheid asks the reader to enter into the world of the rebels and to confront the moral complexity and social duress they experienced as they invented new social forms and violently attacked old ones It is an important study of collective action that will be of great interest to sociologists and to scholars of Africa particularly to those interested in the antiapartheid struggle Towards a Political Aesthetics of Cinema Sulgi Lie,2025-10-01 Towards a Political Aesthetics of Cinema The Outside of Film is a contribution to an aesthetics of cinema rooted in Marxist theory Rather than focusing on the role that certain films or the cinema as an institution might play in political consciousness the book asks a different question how can the subject of politics in film be thought This problem is presented in a systematic theoretical rather than historical manner The main aim of this book is a retrospective rehabilitation of the psychoanalytical concept of suture whose political core is progressively revealed In a second step this rereading of suture theory is mediated with the Marxist aesthetics of Fredric Jameson From the perspective of this reconfigured aesthetics of negativity films by Hitchcock Antonioni Haneke and Kubrick are analyzed as articulations of a political unconscious **American Book Publishing Record** ,1996

Literature and Ecotheology George B. Handley,2024-07-22 Literature and Ecotheology From Chaos to Cosmos challenges us in a time of climate crisis to find more common ground between the dual projects of ecocriticism and ecotheology This book argues that in our postsecular age literature has become an important repository of theological wisdom that can like formal work in ecotheology provide the moral grounds for environmental care However for any cosmological understanding to be adequate to the challenges before us it must be responsive to the often painful contingencies and uncertainties that inhere in the cosmos something that both ecocriticism and ecotheology have often neglected After a treatment of the ecocritical and ecotheological questions that pertain to the religious secular divide the study then turns to four contemporary American writers Annie Dillard Cormac McCarthy Marilynne Robinson and David James Duncan as examples Each uses the contingency of literary form and its promise of wholeness in order to imagine reasons for hope in light of the unpredictability and untold human and more than human suffering that lie at the heart of nature The book will be of interest to students scholars and researchers interested in ecotheology religious studies environmental literature the environmental humanities and environmental studies more broadly It offers a needed paradigm shift in how Western societies have tended to misuse both secularity and religion *The Naked And The Undead* Cynthia Freeland,2018-03-05 Horror is often dismissed as mass art or lowbrow entertainment that produces only short term thrills Horror films can be bloody gory and disturbing so some people argue that they have had moral effects inciting viewers to imitate cinematic violence or desensitizing them to atrocities In The Naked and the Undead Evil and the Appeal of Horror Cynthia A Freeland seeks to counter both aesthetic disdain and moral condemnation by focusing on a select body of

important and revealing films demonstrating how the genre is capable of deep philosophical reflection about the existence and nature of evil both human and cosmic In exploring these films the author argues against a purely psychoanalytic approach and opts for both feminist and philosophical understandings She looks at what it is in these movies that serves to elicit specific reactions in viewers and why such responses as fear and disgust are ultimately pleasurable The author is particularly interested in showing how gender figures into screen presentations of evil The book is divided into three sections Mad Scientists and Monstrous Mothers which looks into the implications of male rationalistic scientific technology gone awry The Vampire s Seduction which explores the attraction of evil and the human ability or inability to distinguish active from passive subject from object and virtue from vice and Sublime Spectacles of Disaster which examines the human fascination with horror spectacle This section concludes with a chapter on graphic horror films like The Texas Chainsaw Massacre Written for both students and film enthusiasts the book examines a wide array of films including The Silence of the Lambs Repulsion Frankenstein The Fly Dead Ringers Alien Bram Stoker s Dracula Interview with the Vampire Frenzy The Shining Eraserhead Hellraiser and many others
