Cahokia And The Archaeology Of Power:

Cahokia and the Archaeology of Power Thomas E. Emerson, 1997-10-30 The consolidation of this symbolism into a rural cult marks the expropriation of the cosmos as part of the increasing power of the Cahokian rulers **Monumental Earthen Architecture in Early Societies: Technology and power display** Annick Daneels, 2016-02-08 Proceedings from a session held as part of the XVII World UISPP Congress Burgos 2014 The theme of the symposium was the archaeology of earthen architecture in pre and protohistoric cultures with an emphasis on constructive techniques and systems and diachronic changes in those aspects **Cahokia's Countryside** Mark Mehrer, 1995 In this first comprehensive analysis of several recently uncovered sites in the American Bottom region Mehrer focuses on household archaeology to shed light on the daily lives of the Mississippian people He examines the objects of daily use domestic and ceremonial buildings storage and processing pits mundane and exotic artifacts to reconstruct the framework of everyday life and to show how the routines of early native people changed with time New findings reveal the changing roles of households in their communities exposing a social order more complex than previously thought Mehrer examines seven sites in the American Bottom region the Robert Schneider BBB Motor Turner DeManger Florence Street Julien Range and Carbon Dioxide sites and integrates his findings with new information from the large Cahokia mound center Analyzing patterns of debris distribution pit morphology and arrangement and household organization he reveals much about the social and cultural developments in the region While illuminating the daily lives of Cahokians Mehrer develops an analytical approach to archaeological site data that can be applied in other parts of the world The Cahokia region is of special interest because the Cahokia site is the largest mound center in North America and because the Mississippian society there rose and fell long before Europeans arrived Although archaeologists have previously focused on Cahokia's elite population until now little has been known about its rural residents

Chieftdoms and Other Archaeological Delusions Timothy R. Pauketat, 2007-05-30 In recent decades anthropology especially ethnography has supplied the prevailing models of how human beings have constructed and been constructed by their social arrangements In turn archaeologists have all too often relied on these models to reconstruct the lives of ancient peoples In lively engaging and informed prose Timothy Pauketat debunks much of this social evolutionary theorizing about human development as he ponders the evidence of chieftdoms left behind by the Mississippian culture of the American southern heartland This book challenges all students of history and prehistory to reexamine the actual evidence that archaeology has made available and to do so with an open mind **Agent of Change** Barbara Roth, E. Charles Adams, 2021-03-03 Ash is an important and yet understudied aspect of ritual deposition in the archaeological record of North America Ash has been found in a wide variety of contexts across many regions and often it is associated with rare or unusual objects or in contexts that suggest its use in the transition or transformation of houses and ritual features Drawn from across the U S and Mesoamerica the chapters in this volume explore the use meanings and cross cultural patterns present in the

use of ash and highlight the importance of ash in ritual closure social memory and cultural transformation **Southeastern Ceremonial Complex** Adam King, 2007-08-26 How certain Southern indigenous viewed themselves from prehistory to decimation by Europeans was already a significant subject of study fifty years ago but more recent scholarship has proven that what was once considered a single cult was actually a complex of cults with myriad adaptations of myths and artifacts This collection of 12 articles details archeological findings and analysis of how this warrior based set of precepts and practices developed and grew into elaborate ceremonial places and burial grounds Topics include the implications of recent analysis of sites early evidence of the Southeastern Ceremonial Complex SECC and its contexts the role of time in development of the SECC material and iconographic evidence of the SECC in Erowah culture evidence from Moundville potsherds SECC ritual regalia in the southern Appalachians and other regions the role of sex in SECC and future directions of research **Journal of Field Archaeology** Association for Field Archaeology, 1999 **The Archaeology of Town Creek** Edmond A. Boudreaux, Edmond A. Boudreaux (III), 2007-11-04 Provides new insights into the community pattern and leadership roles at a major Mississippian archaeological site The sequence of change for public architecture during the Mississippian period may reflect a centralization of political power through time In the research presented here some of the community level assumptions attributed to the appearance of Mississippian mounds are tested against the archaeological record of the Town Creek site the remains of a town located on the northeastern edge of the Mississippian culture area In particular the archaeological record of Town Creek is used to test the idea that the appearance of Mississippian platform mounds was accompanied by the centralization of political authority in the hands of a powerful chief A compelling argument has been made that mounds were the seats and symbols of political power within Mississippian societies While platform mounds have been a part of Southeastern Native American communities since at least 100 B C around A D 400 leaders in some communities began to place their houses on top of earthen mounds an act that has been interpreted as an attempt to legitimize personal authority by a community leader through the appropriation of a powerful traditional community oriented symbol Platform mounds at a number of sites were preceded by a distinctive type of building called an earthlodge a structure with earth embanked walls and an entrance indicated by short parallel wall trenches Earthlodges in the Southeast have been interpreted as places where a council of community leaders came together to make decisions based on consensus In contrast to the more inclusive function proposed for premound earthlodges it has been argued that access to the buildings on top of Mississippian platform mounds was limited to a much smaller subset of the community If this was the case and if ground level earthlodges were more accessible than mound summit structures then access to leaders and leadership may have decreased through time Excavations at the Town Creek archaeological site have shown that the public architecture there follows the earthlodge to platform mound sequence that is well known across the South Appalachian subarea of the Mississippian world The clear changes in public architecture coupled with the extensive exposure of the site s domestic

sphere make Town Creek an excellent case study for examining the relationship among changes in public architecture and leadership within a Mississippian society **Hero, Hawk, and Open Hand** Richard F. Townsend, 2004-01-01 Along the Ohio Tennessee and Mississippi Rivers the archaeological remains of earthen pyramids plazas large communities and works of art and artifacts testify to Native American civilizations that thrived there between 3000 B C and A D 1500 This fascinating book presents exciting new information on the art and cultures of these ancient peoples and features hundreds of gorgeous photographs of important artworks artifacts and ritual objects excavated from Amerindian archaeological sites Drawing on excavation findings and extensive research the contributors to the book document a succession of distinct ancient populations in the pre Columbian world of the American Midwest and Southeast A team of interdisciplinary scholars examines the connections between archaeological remains of different regions and the themes forms and rituals that continue in specific tribes of today The book also includes the personal reflections of contemporary Native Americans who discuss their perspectives on the significance of the fascinating and beautiful prehistoric artifacts as well as their own cultural practices today Leadership and Polity in Mississippian Society Brian M. Butler, Paul D. Welch, 2006 The contributors to this volume argue for a much richer view of variation in Mississippian leadership structures including variation in gender relations economic structure political institutions and religious organization than the often dichotomized view of simple vs complex chiefdoms **Archaeological Investigations at the Quicksilver Site (11MS1992)** Charles Richard Moffat, 2008 **Signs of Power** Jon L. Gibson, Philip J. Carr, 2004-05-11 By focusing on the first instances of mound building pottery making fancy polished stone and bone as well as specialized chipped stone artifacts and their widespread exchange this book explores the sources of power and organization among Archaic societies The Florida Anthropologist, 2005 Contains papers of the Annual Conference on Historic Site Archeology **Ancient Complexities** Susan M. Alt, 2010 A current overview of what is meant by cultural complexity and how archaeologists study the development of complex societies in North America **Mounds, Modoc, and Mesoamerica** Melvin Leo Fowler, 2000 **Marginality and Continuity** Steven R. Ahler, Paul P. Kreisa, Richard Edging, 2010 The concepts of core periphery and margin are employed by the authors to model similarities differences and changing relations between people living in the northern Ozarks and contemporary peoples living in adjacent regions but particularly the Mississippi and lower Illinois valleys to the east Cultural cores are typically those exhibiting the highest level of social political economic technological ideological and aesthetic development For the prehistoric past in the midcontinent Middle Woodland Havana Hopewell of the lower Illinois valley and the Mississippian polity of Cahokia in the American Bottom area come readily to mind as cultural cores The authors argue that the northern Ozarks was on the margin of these cores whereas the area was occupied at other times by people well within the mainstream of cultural development From Foreword p xiii *JOURNAL OF FIELD ARCHAEOLOGY*, 1998 Commoner Ritual and Ideology in Ancient Mesoamerica Nancy Gonlin, Jon C. Lohse, 2007-01-30 This volume explores the

ritual life of Mesoamerica's common citizens inside and outside of the domestic sphere from Formative through Postclassic periods Building from the premise that ritual and ideological expression inhered at all levels of society in Mesoamerica the contributors demonstrate that ideology did not emanate solely from exalted individuals and that commoner ritual expression was not limited to household contexts Taking an empirical approach to this under studied and under theorized area contributors use material evidence to discover how commoner status conditioned the expression of ideas and values

Theory and Practice of Archaeological Residue Analysis H. Barnard, Jelmer W. Eerkens, 2007 Organic residues include a broad range of materials that can be analyzed at a macro micro or molecular level They represent the carbon based remains in combination with H N O P and S of fungi plants animals and humans Organic residue analysis is a relatively new technique to archaeology The chapters of this volume bring together scholars from across the globe and attest to the diverse range of analytical methods material types spatio temporal cultural units and research questions to which organic residue analysis has been applied They are partly the proceedings of a symposium on this subject held on 31 March 2005 in Salt Lake City Utah during the 70th Annual Meeting of the Society for American Archaeology and partly the result of invitations to contribute forwarded to many active in this field The Archaeology of the East St. Louis Mound Center Timothy R. Pauketat, 2005
