Linguistic and Genetic (mtDNA) Connections between Native Peoples of Alaska and California Cecil H. Brown, Kent G. Lightfoot, Nancy J. Turner, Dana Lepofsky, 2024-11-05

Linguistic and Genetic mtDNA Connections between Native Peoples of Alaska and California Ancient Mariners of the Middle Holocene traces the linguistic and biological connections between contemporary Aleut people of southwest Alaska and historic Utian people of central California During the Middle Holocene Period Aleut and Utian languages diverged from their common parent language Proto Aleut Utian PAU spoken by people who resided on or near Kodiak Island in coastal southwest Alaska Around the time of divergence Utians departed the PAU homeland migrating by watercraft along the eastern Pacific coast to the San Francisco Bay Area The affiliation between Aleut and Utian languages is strongly supported by comparative linguistics and by the genetic link mtDNA of groups speaking these languages On their migration Utians encountered coastal groups speaking languages different from their own Through these prolonged and intimate interactions words were borrowed from Utian into the languages of these native coastal communities Other significant findings explored in this book are the lack of compelling evidence for the kinship of Eskimo and Aleut peoples despite scholarship's long term acceptance of this proposal and the discovery of language structure features shared by Yeniseian and Na Dene indicating an historical connection for these circumarctic languages
