

Take a few minutes to review the definition of a continuous function of one variable from your first year calculus textbook. You can also watch the following animation for a visual representation of continuity for a function in one variable.

Review of Continuity for Single-Variable Functions

A function of one variable $f(x)$ is continuous at $x = a$ if and only if

1. f is defined at $x = a$
2. $\lim_{x \rightarrow a} f(x)$ exists, which means that
 - a. $\lim_{x \rightarrow a^-} f(x)$ exists; and
 - b. $\lim_{x \rightarrow a^+} f(x)$ exists; and
 - c. $\lim_{x \rightarrow a^-} f(x) = \lim_{x \rightarrow a^+} f(x)$
3. $\lim_{x \rightarrow a} f(x) = f(a)$

Your Turn

Give an example of a function $y = f(x)$ which is defined for all $x \in \mathbb{R}$, but is not continuous at $x = 0$.

Martin,2012-12-06 Why have another book in the bone calcium field When the idea was first raised that this important area of biomedical research should be given more attention in the review literature we felt that comprehensive texts recently published and in press were directed at more general audiences and did not address in detail some of the important areas of current investigation As this field has grown and matured information has accumulated at such a rapid rate that it has become impossible to keep abreast of all areas by reading the original articles in the scientific literature Accordingly we believed there was a void which could be filled by a collection of essays on specific topics in which significant progress had recently been made Thus this book is meant to be an up to date account of specific topics by investigators at the forefront of their areas of research We have tried to review major areas of basic science in the field which have an impact on our understanding of the diseases of bone and mineral We hope that you will agree that the authors have done an outstanding job and will find the volume as stimulating to read as we have San Antonio TX USA GREGORY R MUNDY Melbourne Australia T JOHN MARTIN Spring 1993 Contents CHAPTER 1 Calcium Homeostasis A M PARFITI With 12 Figures 1 A Introduction and Scope 1 B Concepts of Homeostasis 3 C Extracellular Fluid Free Calcium The Controlled Variable *Manual of Conchology* ,1894 Annual Report Vermont Agricultural Experiment Station,1899 *A General and Analytical Index to the American Cyclopaedia* Thomas Jefferson Conant,1878 **Annual Report** Vermont.
