**New Perspectives on Concepts** Julia Langkau, Christian Nimtz, 2010 Much recent work on concepts has been inspired by and developed within the bounds of the representational theory of the mind, often taken for granted by philosophers of mind, cognitive scientists, and psychologists alike. The contributions to this volume take a more encompassing perspective on the issue of concepts. Rather than modelling details of our representational architecture in line with the dominant paradigm, they explore three traditional issues concerning concepts: Is mastery of a language necessary for thought? Do concepts reduce

to abilities Is the analysis of concepts a viable means to ascertain truths from the proverbial armchair An introductory essay provides a rough geography of key ideas and issues shaping the overall debate on concepts within contemporary philosophy
