## **Calculus Early Transcendentals Matrix Version:**

**Calculus** Charles Henry Edwards, 2002      **The Calculus Collection** Caren L. Diefenderfer, Roger B. Nelsen, 2010-12-31  
The Calculus Collection is a useful resource for everyone who teaches calculus in high school or in a 2 or 4 year college or university. It consists of 123 articles selected by a panel of six veteran high school teachers, each of which was originally published in Math Horizons, MAA Focus, The American Mathematical Monthly, The College Mathematics Journal, or Mathematics Magazine. The articles focus on engaging students who are meeting the core ideas of calculus for the first time. The Calculus Collection is filled with insights, alternate explanations of difficult ideas, and suggestions for how to take a standard problem and open it up to the rich mathematical explorations available when you encourage students to dig a little deeper. Some of the articles reflect an enthusiasm for bringing calculators and computers into the classroom, while others consciously address themes from the calculus reform movement. But most of the articles are simply interesting and timeless explorations of the mathematics encountered in a first course in calculus.      **Calculus** Charles Henry Edwards (jr.), David E. A mainstream calculus book with the most flexible and open approach to new ideas and calculator/computer technology. Solid coverage of the calculus of early transcendental functions is now fully integrated in Chapters 1 through 6. A new Chapter 8 on differential equations appears immediately after the chapter on techniques of integration. It includes both direction fields and Euler's method together with the more symbolic elementary methods and applications for both first and second order equations. The CD-ROM accompanying the book contains a functional array of fully integrated learning resources linked to individual sections of the book.
