Digital Access and Museums as Platforms Caroline Wilson-Barnao, 2021-07-25 Digital Access and Museums as Platforms draws on interviews with museum practitioners along with a range of case studies from public and private institutions in order to investigate the tensions and benefits involved in making cultural collections available using digital technologies Taking a media and critical studies approach to the museum and raising questions about the role of privately owned search engines in facilitating museum experiences the book questions

who collects what for whom objects are collected and what purpose these objects and collections serve Connecting fieldwork undertaken in Australia and New Zealand with the global practices of technology companies Wilson Barnao brings attention to an emerging new model of digital ownership and moderation Considering the synergising of these institutions with media systems which are now playing a more prominent role in facilitating access to culture the book also explores the motivations of different cultural workers for constructing the museum as a mediatised location Digital Access and Museums as Platforms will be of interest to academics and students working in the fields of museum studies art culture media studies and digital humanities Weighing in on conversations about how technologies are being incorporated into museums the book should also be useful to practitioners working in museums and galleries around the world *Great Power Cyber Competition* David V. Gioe, Margaret W. Smith, 2024-02-20 This volume conceptualizes the threats challenges opportunities and boundaries of great power cyber competition of the 21st century This book focuses on a key dimension of contemporary great power competition that is often less understood due to its intangible character the competition taking place in the cyber domain including information and cyber operations Democracies across the globe find themselves in an unrelenting competition with peer and near peer competitors with a prevailing notion that no state is safe from the informational contest Adversarial powers particularly China and Russia recognize that most competition is principally non kinetic but dominates the information environment and cyberspace and the volume articulates the Russian and Chinese strategies to elevate cyber and information competition to a central position Western governments and in particular the U S government have long conceived of a war peace duality but that perspective is giving way to a more nuanced perception of competition This volume goes beyond analyzing the problems prevalent in the information space and offers a roadmap for Western powers to compete in and protect the global information environment from malicious actors Its genesis is rooted in the proposition that it is time for the West to push back against aggression and that it needs a relevant framework and tools to do so The book demonstrates that Western democratic states currently lack both the strategic and intellectual acumen to compete and win in the information and cyber domains and argues that the West needs a strategy to compete with near peer powers in information and cyber warfare This book will be of much interest to students of cyber warfare information warfare defense studies and international relations in general as well as practitioners *Understanding Crisis in Critical Care* Ronaldo Collo Go, 2021-11-26 The first detailed retrospective of the spread and management of COVID 19 and a blueprint for better management of the next major healthcare crisis From a team of global experts Understanding Crisis in Critical Care describes the global spread of COVID 19 and analyzes how it was managed compared to other deadly epidemics such as SARS and MERS The book features contributors from across the world who dealt first hand with COVID 19 making this a truly global retrospective on new global pandemics Organized into three sections the text covers critical care changes associated with crises crises in pandemics trauma and crises in war and natural disasters You ll learn how hospitals are transformed to accommodate surges in patients

while dealing with shortages in staffing medications mechanical ventilators and personal protective equipment and get an invaluable look at how real time critical decision were made during the height of the pandemic This one of a kind guide covers Working the frontlines Antimicrobials versus Immunomodulators Respiratory failure and mechanical ventilation Repurposing therapies for COVID 19 Endocrinologic and cardiovascular Issues Special Populations pediatrics and immunocompromised patients SARS MERS COVID 19 Ebola Anthrax Influenza Traumatic brain and lung injury Palliative care and bioethics Psychiatric issues Intensive care units under austere conditions Terrorism biological and chemical
