Building Intelligent Interactive Tutors Beverly Park Woolf, 2010-07-28 Building Intelligent Interactive Tutors discusses educational systems that assess a student's knowledge and are adaptive to a student's learning needs. The impact of computers has not been generally felt in education due to lack of hardware, teacher training, and sophisticated software, and because current instructional software is neither truly responsive to student needs nor flexible enough to emulate teaching. Dr. Woolf taps into 20 years of research on intelligent tutors to bring designers and developers a broad range of issues and methods that produce the best intelligent learning environments possible, whether for classroom or life-long learning. The book describes multidisciplinary approaches to using computers for teaching, reports on research, development, and real-world experiences, and discusses intelligent tutors, web-based learning systems, adaptive learning systems, intelligent agents, and intelligent multimedia. It is recommended for professionals, graduate students, and others in computer science and educational technology who are developing online tutoring systems to support e-learning and who want to build intelligence into the system. Combines both theory and practice to offer most in-depth and up-to-date treatment of intelligent tutoring systems available. Presents powerful drivers of virtual teaching systems, including cognitive science, artificial intelligence, and the Internet. Features algorithmic material that enables programmers and researchers to design building components and intelligent systems. Popular Photography - ND, 1948-10 *Saturday Review of Literature*, 1925 **American Primary Teacher**, 1909 **5-Gen Leadership** Mark White, 2021-09-07 An unprecedented leadership challenge for school administrators. Today's school leaders face the unprecedented challenge of leading five generations: Baby Boomers, Generation X, Millennials, and brand new Generation Z, along with Gen Alpha, today's youngest students. Based on extensive research and the author's experience working with thousands of educators and students, *5 Gen Leadership* addresses the nuances and expectations implicit with leading each generation. With an emphasis on developing a multi-generational lens through which to view school improvement, this book covers topics such as recruiting and retaining today's young teachers, tailoring professional development for each generation, and helping each generation succeed in a complex, accelerating world. Readers will also find tactics for transitioning to 5 Gen Leadership and understanding the four distinct generations in the teaching staff. Moving leadership styles from a managing model to a coaching model. Advice for understanding and creating a welcoming environment for Gen Z and Gen Alpha. Suggestions for closing the digital generation gaps that emerged during the COVID-19 school closures. A glimpse into the future to imagine how new generations of leaders will help reshape schools by 2030. If we're going to make the most of reforming our schools in the 2020s and keep up with the exponential rate of change in society, we must understand today's students and the four disparate generations in our staffs. This book is critical to help leaders bridge those gaps. How do we prepare today's students for the rapidly changing workplace and society in which they will live, work, and interact in an education system designed for a century that has passed?
