*Technology-mediated Learning During the Pandemic* Jitendra

Singh,Vikas Kumar,2024-06-21 This volume discusses the emergence of information and communication technology ICT based teaching and learning during the Covid 19 pandemic as a potential alternative to traditional classroom based learning It presents a collection of theories practices and case studies from across the globe and covers different aspects of education from a multidisciplinary perspective While focusing on the various opportunities that surfaced while carrying out innovative experiments in the online learning space the book discusses pedagogical challenges and the need for a shift in teaching pedagogy towards online learning It outlines the existing learning theories reasons behind their failure and new theories that emerged to fill the need for new methods for delivery of content and pedagogy The book discusses the issues faced by stakeholders including institute administrators students and teachers to prepare for this new method of teaching and learning It highlights the role of virtual laboratories in supplementing the needs of students in the remote learning environment The book also discusses the role and impact of social media as a powerful tool of learning and educational communication This book will be of interest to teachers students and researchers of education higher education digital education information technology educational psychology and media studies It will also be useful for courses on e learning educationalists policymakers educational institutions online education centres and practitioners working in the related areas

**A Textbook of Artificial Intelligence for Class IX (A.Y. 2023-24)Onward** Hema Dhingra,2023-05-20 The term artificial intelligence may sound intimidating to some but it has been in use for decades and its applications are more common than you might imagine It is gaining the spotlight across applications in our personal and professional lives AI is still at a relatively early stage of development so that the range of potential applications have ample scope left for further development It holds the promise of solving some of the most pressing issues facing society but also presents challenges such as unethical use of data and potential job displacement There are so many amazing ways artificial intelligence and machine learning are used behind the scenes to impact our everyday lives A1 assists in every area of our lives whether we re trying to read our emails get driving directions get music or movie recommendations AI is a constellation of technologies that enable machines to act with higher levels of intelligence and emulate the human capabilities of sense comprehend and act A1 is not specifically related to computer science This is a field of study that encompasses human behaviour biology psychology and even language and linguistics AI presents opportunities to complement and supplement human intelligence and enrich the way people live and work Artificial Intelligence is being widely recognized to be the power that will fuel this future global digital economy Countries around the world are becoming increasingly aware of the potential benefits of developing and applying AI From SIRI to self driving cars artificial intelligence AI is progressing rapidly While science fiction often portrays AI as robots with human like characteristics AI can encompass anything from Google s search algorithms to IBM s Watson to autonomous weapons From Amazon shopping recommendations Facebook image recognition and personal assistants like Siri Cortana and Alexa your phone is becoming a portal to real world applications of artificial intelligence This book is a glimpse

into the future that illustrates how AI will continue to transform our daily lives in the near future Digitalisation and the new technological possibilities that artificial intelligence AI brings are driving the biggest social and economic changes since the industrial revolution Without the right political economic and ethical framework conditions there is a risk of uncontrolled development and a negative impact of AI Artificial intelligence AI is doing a lot of good and will continue to provide many benefits for our modern world but along with the good there will inevitably be negative consequences The sooner we begin to contemplate what those might be the better equipped we will be to mitigate and manage the dangers While writing the book we have tried to keep the explanation simple with lots of examples and illustrations Lastly there is always a scope of improvement Thus it is a request to our esteemed readers to send the feedback and suggestions etc for the improvement of the book All your requests are welcome

**Enhancing the Human Experience through Assistive Technologies and E-Accessibility** Kouroupetroglou, Christos, 2014-06-30 Information Communication Technologies ICT have become an increasingly prevalent part of everyday life Today there are many cases in which ICT assist the elderly and people with disabilities to complete tasks once thought impossible Enhancing the Human Experience through Assistive Technologies and E Accessibility discusses trends in ICT in relation to assistive technologies and their impact on everyday tasks for those with disabilities This reference work provides different perspectives on upcoming technologies and their impact on e accessibility and e inclusion essential topics for researchers businesses and ICT product developers in the field of assistive technologies
