Mariscotti, 2025-04-24 The context of business has been changing for companies in recent years and following numerous corporate and accounting scandals many countries have increased the number of national and international regulations designed to ensure transparency and compliance with the law Because of the existence of these new regulations the level of control the severity of sanctions by governments and the amount of fines for noncompliance have increased dramatically In parallel with the technological revolution in communications business management has become more transparent and any negative event is uploaded to social networks and shared with an indeterminate number of people This change in the regulatory sanctioning and technological context has forced large companies to rethink risks investments and budgets to deal with this more complex environment To transition to this change some companies have included ethics and compliance programs in their corporate agenda along with marketing and sales plans strategies growth targets investment plans and or talent acquisition While each industry has its particular risks in this book the author describes the essential elements that
