XII Mediterranean Conference on Medical and Biological Engineering and Computing 2010 Nicolas Pallikarakis, Panagiotis D. Bamidis, 2010-05-28 Over the past three decades the exploding number of new technologies and applications introduced in medical practice often powered by advances in biosignal processing and biomedical imaging created an amazing account of new possibilities for diagnosis and therapy but also raised major questions of appropriateness and safety The accelerated development in this field alongside with the promotion of electronic health care solutions is often on the basis of an uncontrolled diffusion and use of medical technology The emergence and use

of medical devices is multiplied rapidly and today there exist more than one million different products available on the world market. Despite the fact that the rising cost of health care partly resulting from the new emerging technological applications forms the most serious and urgent problem for many governments today, another important concern is that of patient safety and user protection issues that should never be compromised and expelled from the Biomedical Engineering research practice agenda.

Social Media Amelia Green, AI, 2025-03-05 In the fast paced world of social media a strategic approach is crucial for building a strong online presence. Social Media offers a comprehensive guide to mastering content calendars a vital tool for anyone looking to boost audience engagement and leverage trends. The book emphasizes the importance of shifting from traditional mass marketing to personalized engagement highlighting how a well structured content calendar informed by data analytics is the cornerstone of successful social media marketing. One interesting insight is the historical evolution of content marketing tracing its roots from traditional advertising to today's data driven strategies. The book unfolds logically beginning with the fundamentals of content strategy and audience analysis and then dissecting the anatomy of a content calendar including formats scheduling tools and KPIs. It then explores advanced strategies for adapting to algorithm changes. Through case studies and industry research the book demonstrates how to create a content ecosystem that aligns with business goals. The focus is on actionable insights making it valuable for social media managers marketing professionals and entrepreneurs alike.

Digital Access and Museums as Platforms Caroline Wilson-Barnao, 2021-07-25 Digital Access and Museums as Platforms draws on interviews with museum practitioners along with a range of case studies from public and private institutions in order to investigate the tensions and benefits involved in making cultural collections available using digital technologies. Taking a media and critical studies approach to the museum and raising questions about the role of privately owned search engines in facilitating museum experiences the book questions who collects what for whom objects are collected and what purpose these objects and collections serve. Connecting fieldwork undertaken in Australia and New Zealand with the global practices of technology companies Wilson Barnao brings attention to an emerging new model of digital ownership and moderation. Considering the synergising of these institutions with media systems which are now playing a more prominent role in facilitating access to culture the book also explores the motivations of different cultural workers for constructing the museum as a mediatised location. Digital Access and Museums as Platforms will be of interest to academics and students working in the fields of museum studies art culture media studies and digital humanities. Weighing in on conversations about how technologies are being incorporated into museums the book should also be useful to practitioners working in museums and galleries around the world.
