Agrawal,2021-06-29 The 2nd International Conference on Artificial Intelligence and Speech Technology AIST2020 was organized by Indira Gandhi Delhi Technical University for Women Delhi India on November 19 20 2020 AIST2020 is dedicated to cutting edge research that addresses the scientific needs of academic researchers and industrial professionals to explore new horizons of knowledge related to Artificial Intelligence and Speech Technologies AIST2020 includes high quality paper presentation sessions revealing the latest research findings and engaging participant discussions The main focus is on novel contributions which would open new opportunities for providing better and low cost solutions for the betterment of society These include the use of new AI based approaches like Deep Learning CNN RNN GAN and others in various Speech related issues like speech synthesis speech recognition etc

The Lean Approach to Digital Transformation Yves Caseau,2022-05-01 The Lean Approach to Digital Transformation From Customer to Code and From Code to Customer is organized into three parts that expose and develop the three capabilities that are essential for a successful digital transformation 1 Understanding how to co create digital services with users whether they are customers or future customers This ability combines observation dialogue and iterative experimentation The approach proposed in this book is based on the Lean Startup approach according to an extended vision that combines Design Thinking and Growth Hacking Companies must become truly customer centric from observation and listening to co development The revolution of the digital age of the 21st century is that customer orientation is more imperative the era of abundance usages rate of change complexity of experiences and shift of power towards communities are easier using digital tools and digital communities 2 Developing an information system IS that is the backbone of the digital transformation called

exponential information system to designate an open IS in particular on its borders capable of interfacing and combining with external services positioned as a player in software ecosystems and built for processing scalable and dynamic data flows The exponential information system is constantly changing and it continuously absorbs the best of information processing technology such as Artificial Intelligence and Machine Learning 3 Building software micro factories that produce service platforms which are called Lean software factories This software factory concept covers the integration of agile methods tooling and continuous integration and deployment practices a customer oriented product approach and a platform approach based on modularity as well as API based architecture and openness to external stakeholders This software micro factory is the foundation that continuously produces and provides constantly evolving services These three capabilities are not unique or specific to this book they are linked to other concepts such as agile methods product development according to lean principles software production approaches such as CICD continuous integration and deployment or DevOps This book weaves a common frame of reference for all these approaches to derive more value from the digital transformation and to facilitate its implementation The title of the book refers to the lean approach to digital transformation because the two underlying frameworks Lean Startup and Lean Software Factory are directly inspired by Lean in the sense of the Toyota Way The Lean approach is present from the beginning to the end of this book it provides the framework for customer orientation and the love of a job well done which are the conditions for the success of a digital transformation

The Innovation Ultimatum
Steve Brown, 2020-01-29 Prepares leaders for the 2020s an accessible guide to the key technologies that will reshape business in the coming decade Most businesses identify six key digital technologies artificial intelligence AI distributed ledgers and blockchain the Internet of Things IoT autonomous machines virtual and augmented reality and 5G communication as critical to their relevance and growth over the coming ten years These new disruptive technologies present significant opportunity for businesses in every industry The first businesses to understand automation and these transformative technologies will be the ones to reap the greatest rewards in the marketplace The Innovation Ultimatum helps leaders understand the key technologies poised to reshape business in the next decade and prepare their organizations for technology enabled change Using straightforward jargon free language this important resource provides a set of strategic questions every leader will need to ask and answer in order to prepare for the impending changes to the business landscape Author Steve Brown shares his insights to help leaders take full advantage of the next wave of digital transformation and describes compelling examples of how businesses are already embracing new technologies to optimize operations create new value and serve customers in new ways Written for anyone that wants to understand how automation and new technology will fundamentally restructure business this book enables readers to Understand the implications of technology driven change across industrial sectors Apply important insights to their own business Gain competitive advantage by implementing new technologies Prepare for the future of work and understand the skills needed to thrive in a post automation economy

Adopt critical digital technologies in any organization Providing invaluable cutting edge content The Innovation Ultimatum is a much needed source of guidance and inspiration for business leaders board members C suite executives and senior managers who need to prepare their businesses for the future

A Textbook of Artificial Intelligence for Class IX (A.Y. 2023-24)Onward Hema Dhingra,2023-05-20 The term artificial intelligence may sound intimidating to some but it has been in use for decades and its applications are more common than you might imagine It is gaining the spotlight across applications in our personal and professional lives AI is still at a relatively early stage of development so that the range of potential applications have ample scope left for further development It holds the promise of solving some of the most pressing issues facing society but also presents challenges such as unethical use of data and potential job displacement There are so many amazing ways artificial intelligence and machine learning are used behind the scenes to impact our everyday lives AI assists in every area of our lives whether we re trying to read our emails get driving directions get music or movie recommendations AI is a constellation of technologies that enable machines to act with higher levels of intelligence and emulate the human capabilities of sense comprehend and act AI is not specifically related to computer science This is a field of study that encompasses human behaviour biology psychology and even language and linguistics AI presents opportunities to complement and supplement human intelligence and enrich the way people live and work Artificial Intelligence is being widely recognized to be the power that will fuel this future global digital economy Countries around the world are becoming increasingly aware of the potential benefits of developing and applying AI From SIRI to self driving cars artificial intelligence AI is progressing rapidly While science fiction often portrays AI as robots with human like characteristics AI can encompass anything from Google s search algorithms to IBM s Watson to autonomous weapons From Amazon shopping recommendations Facebook image recognition and personal assistants like Siri Cortana and Alexa your phone is becoming a portal to real world applications of artificial intelligence This book is a glimpse into the future that illustrates how AI will continue to transform our daily lives in the near future Digitalisation and the new technological possibilities that artificial intelligence AI brings are driving the biggest social and economic changes since the industrial revolution Without the right political economic and ethical framework conditions there is a risk of uncontrolled development and a negative impact of AI Artificial intelligence AI is doing a lot of good and will continue to provide many benefits for our modern world but along with the good there will inevitably be negative consequences The sooner we begin to contemplate what those might be the better equipped we will be to mitigate and manage the dangers While writing the book we have tried to keep the explanation simple with lots of examples and illustrations Lastly there is always a scope of improvement Thus it is a request to our esteemed readers to send the feedback and suggestions etc for the improvement of the book All your requests are welcome

The Implications of new Technology, particularly Artificial intelligence (AI) for International Politics Malam Wasai,2023-09-18 Submitted Assignment from the year 2023 in the subject Politics General

and Theories of International Politics language English abstract Greater scrutiny is necessary because AI will have a significant impact on international relations such as putting new topics on the international agenda challenging geostrategic relations serving as a tool for diplomats and negotiators and creating new opportunities and concerns about protecting human rights Scholars and diplomats have found it helpful to think about the different things that affect international relations by breaking them down into three levels of analysis individual state and international State level analysis examines the foreign policy behavior of states in terms of state characteristics For example some scholars say that all democracies behave a certain way they don t fight with other democracies Artificial intelligence impact governance As AI continues to evolve and permeate various aspects of our lives its implications for AI and how does it impact businesses AI artificial intelligence refers to machines that can perceive intelligence synthesize and infer information It is the science and engineering of intelligent machines that can mimic human intelligence to perform tasks and then on the information they collect improve themselves based AI is designed to significantly enhance human capabilities and contributions making it a valuable business asset
