ChatGPT Best Practices

What is ChatGPT?

ChatGPT is a computer program created by OpenAI that is designed to understand and generate human language. It was trained using a type of artificial intelligence, called a neural network, that has been trained on a large amount of text data. ChatGPT can generate responses to questions or prompts in a way that is often indistinguishable from human language, although it is not perfect. It can be used to generate text, answer questions, and even to help with creative tasks.
