The Start-up Founder's Guide to Digital Marketing Pramod Maloo, 2025-11-12

We don't have budgets to hire a chief marketing officer. While I understand marketing, this digital marketing is not my cup of tea. How do I know that the digital marketing agency I have hired is not taking me for a ride? How many times have you heard these statements from start-up founders? In the digital age where customers are buying more of digital influence, think Instagram, Meta, and Google searches, startup owners need to be in control of their digital marketing game. The Start-up Founder's Guide to Digital Marketing brings you the business owner at the center stage and puts you in control of your digital marketing game. This 7-step guide will take you through the nuances of the digital game like never before, understand your target consumer's behavior, and allocate your budgets in a focused manner so you can grow your business without losing your sleep and money.

The Implications of new Technology, particularly Artificial intelligence (AI) for International Politics Malam Wasai, 2023-09-18. Submitted Assignment from the year 2023 in the subject Politics General and Theories of International Politics. Language: English. Abstract: Greater scrutiny is necessary because AI will have a significant impact on international relations such as putting new topics on the international agenda, challenging geostrategic relations, serving as a tool for diplomats and negotiators, and creating new opportunities and concerns about protecting human rights. Scholars and diplomats have found it helpful to think about the different things that affect international relations by breaking them down into three levels of analysis: individual, state, and international. State-level analysis examines the foreign policy behavior of states in terms of state characteristics. For example, some scholars say that all democracies behave a certain way; they don't fight with other democracies. Artificial intelligence impacts governance. As AI continues to evolve and permeate various aspects of our lives, its implications for AI and how it impacts businesses. AI artificial intelligence refers to machines that can perceive, intelligence, synthesize, and infer information. It is the science and engineering of intelligent machines that can mimic human intelligence to perform tasks and then on the information they collect, improve themselves. Based AI is designed to significantly enhance human capabilities and contributions, making it a valuable business asset.
