Parvathy, Dr. M. Umayavalli, Dr. P. Ramu, Mrs. V. Manjula, 2023-07-28 The researcher's inner world is formed by his or her choice of research methodology which considers the nature of the study and the researcher's philosophy time frame and other contextual factors Furthermore the research methodology works as the central nervous system since it limits the scope of the investigation and because proper research work necessitates that both the internal and exterior surroundings adhere to the correct research methodology procedure Research methodologies refer to the procedures used to assemble information for studies The data might be used for theoretical or applied studies such as the strategic conceptualization of management research operational planning methodologies and change management Most of your work will be done when you complete the data analysis However before you start you need to consider specific crucial issues in research technique such as the validity of research data ethics and dependability After this comes the research plan which might be either purely experimental or include some elements of experimentation The last two steps are analyzing the data and producing the research report The data is meticulously sorted into graphs tables and only the most relevant information is presented A researcher must develop a research approach appropriate to the study's subject matter It is essential to remember that even if two topics need the same study approach the research technique might differ **Media Authorship** Cynthia Chris, David A.
