Dam Removal Success Stories I. Chrisholm, American Rivers, Friends of the Earth, Trout Unlimited, 1999 **Dam Removal Success Stories**, 1999 The Challenges of Dam Removal and River Restoration Jerome V. DeGraff, James Erwin Evans, 2013-02-01 River restoration is a societal goal in the United States This collection of research articles focuses on our current understanding of the impacts of removing dams and the role of dam removal in the larger context of river restoration The papers are grouped by topic 1 assessment of existing dams strategies to determine impounded legacy sediments and evaluating whether or not to remove the dam 2 case studies of the hydrologic sediment and ecosystem impacts of recent dam removals 3 assessment of river restoration by modifying flows or removing dams and 4 the concept of river restoration in the context of historical changes in river systems Provided by publisher Paying for Dam Removal Margaret Bowman, 2000

Aquanomics B. Delworth Gardner, Randy T. Simmons, 2012-08-14 Water is becoming increasingly scarce If recent usage trends continue shortages are inevitable Aquanomics discusses some of the instruments and policies that may be implemented to postpone or even avoid the onset of water crises These policies include establishing secure and transferable private water rights and extending these rights to uses that traditionally have not been allowed including altering in stream flows and ecosystem functions The editors argue that such policies will help maximize water quantity and quality as water becomes scarcer and more valuable Aquanomics contains many examples of how this is being accomplished particularly in the formation of water markets and market like exchanges of water rights Many observers see calamity ahead unless water supplies are harnessed and effectively conserved and unless water quality can be improved It is also clear that declining water quality is a serious problem in much of the world as increasing human activities induce high levels of water degradation Those who voice these concerns argue the contributors to this volume fail to consider the forces for improvement inherent in market political economic systems that can address water issues The contributors see water quality in economically advanced countries as improving and they believe this establishes the validity of market based approaches

Environmental Politics and Policy in the West, Revised Edition Zachary A. Smith, John Freemuth, 2007-08-30 Population growth and industrial development have put the wide open spaces and natural resources that define the West under immense stress Vested interests clash and come to terms over embattled resources such as water minerals and even open space The federal government controls 40 to 80 percent of the land base in many western states its sway over the futures of the West's communities and environment has prompted the development of unique policies and politics in the West Zachary A Smith and John Freemuth bring together a roster of top scholars to explicate the issues noted above as well as other key questions in this new edition of *Environmental Politics and Policy in the West* which was first published in 1993 This thoroughly revised and updated edition offers a comprehensive and current survey Contributors address the policy process as it affects western states how bureaucracy and politics shape environmental dialogues in the West how western states innovate environmental

policies independently of Washington and how and when science is involved or ignored in management of the West's federal lands. Experts in individual resource areas explore multifaceted issues such as the politics of dam removal and restoration, wildlife resource concerns, suburban sprawl and smart growth, the management of hard rock mining, and the allocation of the West's tightly limited water resources. Contributors include Leslie R. Alm, Carolyn D. Baber, Walter F. Baber, Robert V. Bartlett, Hugh Bartling, Matthew A. Cahn, R. McGreggor Cawley, Charles Davis, Sandra Davis, John C. Freemuth, Sheldon Kamieniecki, Matt Lindstrom, William R. Mangun, Denise McCain, Tharnstrom, Daniel McCool, Jaina L. Moan, and Zachary A. Smith.

Exploring Dam Removal, 2002 America's Fight Over Water, Kevin Wehr, 2005-01-01.
